DIRECTORS' REPORT (CONTINUED)

DIRECTORS' REMUNERATION

Total Directors' remuneration incurred by the Group and the Company for the financial year ended 31 December 2024 were RM20,880,000 (2023: RM15,409,000) and RM20,524,000 (2023: RM14,518,000) respectively. Further details are disclosed in Note 7(e) to the financial statements.

OTHER STATUTORY INFORMATION

Before the financial statements of the Group and the Company were prepared, the Directors took reasonable steps:

- (a) to ascertain that proper action had been taken in relation to the writing off of bad debts and the making of provision for doubtful debts and have satisfied themselves that all known bad debts had been written off and that adequate provision had been made for doubtful debts; and
- (b) to ensure that any current assets which were unlikely to be realised in the ordinary course of business including values of current assets as shown in the accounting records of the Group and of the Company had been written down to an amount which the current assets might be expected so to realise.

At the date of this report, the Directors are not aware of any circumstances:

- (a) which would render the amounts written off for bad debts or the amount of the provision for doubtful debts in the financial statements of the Group and the Company inadequate to any substantial extent; or
- (b) which would render the values attributed to current assets in the financial statements of the Group and the Company misleading; or
- (c) which have arisen which render adherence to the existing method of valuation of assets or liabilities of the Group and the Company misleading or inappropriate.

No contingent or other liability of the Group and the Company has become enforceable or is likely to become enforceable within the period of twelve (12) months after the end of the financial year which, in the opinion of the Directors, will or may affect the ability of the Group and the Company to meet its obligations when they fall due.

At the date of this report, there does not exist:

- (a) any charge on the assets of the Group and the Company which has arisen since the end of the year which secures the liability of any other person; or
- (b) any contingent liability of the Group and the Company which has arisen since the end of the year.

DIRECTORS' REPORT (CONTINUED)

OTHER STATUTORY INFORMATION (CONTINUED)

At the date of this report, the Directors are not aware of any circumstances not otherwise dealt with in this report or the financial statements of the Group and the Company, which would render any amount stated in the financial statements misleading.

In the opinion of the Directors:

- (a) the results of the Group's and the Company's operations during the financial year were not substantially affected by any item, transaction or event of a material and unusual nature other than as disclosed in the financial statements; and
- (b) except as disclosed in Note 46 to the financial statements, there has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely to affect substantially the results of the operations of the Group and the Company for the financial year in which this report is made.

AUDITORS' REMUNERATION

Total fees for statutory audits provided by the auditors amounted to RM16,154,000 (2023: RM15,069,000) and RM2,249,000 (2023: RM2,350,000) for the Group and the Company respectively, while total fees for audit related and non-audit services amounted to RM9,124,000 (2023: RM7,509,000) and RM5,946,000 (2023: RM3,296,000) for the Group and the Company respectively. Further details are disclosed in Note 7(c) to the financial statements.

INDEMNITY AND INSURANCE FOR DIRECTORS AND OFFICERS

The Company maintains a group corporate liability insurance for the Directors and officers of the Group throughout the financial year. The Group's liability insurance provides appropriate insurance cover for the Directors and officers of the Group. The insurance premium paid by the Company in respect of the group corporate liability insurance for the financial year amounted to RM563,757 (2023: RM509,358).

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024**

1. GENERAL INFORMATION

The principal activities of the Group are the provision of mobile communication services, including interconnect and sale of devices, television transmission and fixed broadband services, managed services, telecommunication infrastructure and related services, and digital businesses.

The principal activities of the Company are investment holding and provision of technical and management services.

The principal activities of the subsidiaries are set out in Note 41 to the financial statements. There has been no significant change in the nature of the activities of the Group and the Company during the financial year.

The address of the registered office and principal place of business of the Company is Level 30, Axiata Tower, 9 Jalan Stesen Sentral 5, Kuala Lumpur Sentral, 50470 Kuala Lumpur.

The financial statements have been approved for issuance in accordance with a resolution of the Board of Directors on 26 March 2025.

2. BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS

The financial statements of the Group and the Company have been prepared in accordance with the provisions of the Malaysian Financial Reporting Standards ("MFRS"), International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

The financial statements of the Group and the Company have been prepared under the historical cost convention except as disclosed in Note 3 to the financial statements.

The financial statements of the Group and the Company are presented in Ringgit Malaysia ("RM") and all values are rounded to the nearest thousand (RM'000) except when otherwise indicated.

The preparation of financial statements of the Group and the Company in conformity with MFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of the revenues and expenses during the reported period. It also requires Board of Directors to exercise their judgement in the process of applying the Group's and the Company's accounting policies. Although these estimates and judgement are based on the Board of Directors' best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the Group's and the Company's financial statements are disclosed in Note 4 to the financial statements.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

2. BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS (CONTINUED)

- (a) Amendments to published standards and IFRIC agenda decision that are applicable to the Group and the Company that are effective

The following amendments to published standards and International Financial Reporting Interpretations Committee (“IFRIC”) agenda decision have been adopted by the Group and the Company for the first time for the financial year beginning on 1 January 2024:

- Amendments to MFRS 101 “Presentation of Financial Statements”
 - (i) Classification of liabilities as current or non-current; and
 - (ii) Non-current liabilities with covenants
- Amendments to MFRS 16 “Leases”: Lease Liability in a Sale and Leaseback
- Amendments to MFRS 107 “Statement of Cash Flows”: Supplier Finance Arrangements
- Amendments to MFRS 7 “Financial Instruments: Disclosures”: Supplier Finance Arrangements
- IFRIC agenda decision on MFRS 8 “Operating Segments”: Revenues and expenses for reportable segments

The adoption of the above has no significant impact to the Group and the Company during the financial year except for supplier finance arrangement as disclosed in Note 20 to the financial statements and disclosure of revenue and expenses for reportable segments as disclosed in Note 39 to the financial statements.

- (b) Amendments to published standards that are applicable to the Group and the Company but not yet effective

The Group and the Company will apply the following amendments to published standards in the financial year beginning on/after 1 January 2025:

- Amendments to MFRS 121 “The Effects of Changes in Foreign Exchange Rates” – Lack of Exchangeability clarify that a currency is exchangeable when an entity is able to exchange it into another currency within a time frame that allows for a normal administrative delay and through a market or exchange mechanism that creates enforceable rights and obligations. If an entity can only obtain no more than an insignificant amount of the other currency at the measurement date for the specified purpose, then the currency is not exchangeable. In such cases, the entity is required to estimate the spot exchange rate at the measurement date.

The amendments do not specify how an entity estimates the spot exchange rate but permit an entity to use observable exchange rate without adjustment or another estimation technique, provided it could meet the objective for estimating the spot exchange rate set out in the amendments.

The amendments to MFRS 121 are not expected to have material impact to the Group.

FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

2. **BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS (CONTINUED)**

- (b) Amendments to published standards that are applicable to the Group and the Company but not yet effective (continued)

The Group and the Company will apply the following amendments to published standards in the financial year beginning on/after 1 January 2026:

- Annual Improvements to MFRS Accounting Standards - Volume 11 which contains a collection of narrow-scope amendments to the following:
 - MFRS 1 “First-time Adoption of Malaysian Financial Reporting Standards” on hedge accounting by a first-time adopter;
 - MFRS 7 “Financial Instruments: Disclosures and Guidance on Implementing MFRS 7” on gain or loss on derecognition;
 - MFRS 9 “Financial Instrument” on lessee derecognition of lease liabilities and transaction price;
 - MFRS 10 “Consolidated Financial Statements” on determination of a ‘de facto agent’; and
 - MFRS 107 “Statement of Cash Flows” to replace the term ‘cost method’ with ‘at cost’.

The annual improvements to MFRS Accounting Standards - Volume 11 amendments are not expected to have impact to the Group and the Company.

- Amendments to MFRS 9 and MFRS 7 “Amendments to the Classification and Measurement of Financial Instruments”. These amendments:
 - require financial assets to be derecognised on the date the contractual rights to the cash flows expire and financial liabilities to be derecognised when obligation under the contract is discharged (i.e. the settlement date). In addition, there is an optional exception to derecognise financial liabilities before the settlement date for settlement using electronic payment systems (if specified criteria are met);
 - clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (SPPI) criterion;
 - add new disclosures for certain instruments with contractual terms that can change cash flows (such as some financial instruments with features linked to the achievement of environment, social and governance targets); and
 - update the disclosures for equity instruments designated at fair value through other comprehensive income.

The amendments to MFRS 9 and MFRS 7 are being assessed by the Group and the Company.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

2. **BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS (CONTINUED)**

- (b) Amendments to published standards that are applicable to the Group and the Company but not yet effective (continued)

The Group and the Company will apply the following new standards in the financial year beginning on/after 1 January 2027:

- MFRS 18 “Presentation and Disclosure in Financial Statements” replaces MFRS 101 “Presentation of Financial Statements”
 - The new MFRS introduces a new structure of profit or loss statement.”
 - (a) Income and expenses are classified into 3 new main categories:
 - i. Operating category which typically includes results from the main business activities;
 - ii. Investing category that presents the results of investments in associates and joint ventures and other assets that generate a return largely independently of other resources; and
 - iii. Financing category that presents income and expenses from financing liabilities.
 - (b) Entities are required to present two new specified subtotals: ‘Operating profit or loss’ and ‘Profit or loss before financing and income taxes.
 - Management-defined performance measures are disclosed in a single note and reconciled to the most similar specified subtotal in MFRS Accounting Standards.
 - Changes to the guidance on aggregation and disaggregation which focus on grouping items based on their shared characteristics.

The new MFRS 18 is being assessed by the Group and the Company.

- MFRS 19 “Subsidiaries without Public Accountability: Disclosures” allows for certain eligible subsidiaries of parent entities that report under MFRSs to apply reduced disclosure requirements.

The new MFRS 19 is being assessed by the Group.

FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (CONTINUED)**

3. MATERIAL ACCOUNTING POLICY INFORMATION

The material accounting policy information in the preparation of these financial statements are set out below:

(a) Economic entities in the Group

(i) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity where the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the:

- fair values of the assets transferred;
- liabilities incurred to the former owners of the acquired business;
- equity interests issued by the Group;
- fair value of any asset or liability resulting from a contingent consideration arrangement; and
- fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the NCI's proportionate share of the acquired entity's net identifiable assets.

Acquisition-related costs are expensed as incurred.

The excess of the:

- consideration transferred;
- amount of any NCI in the acquired entity; and
- acquisition-date fair value of any previous equity interest in the acquired entity

over the fair value of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the business acquired, the difference is recognised directly in profit or loss as a bargain purchase.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

3. MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)

(a) Economic entities in the Group (continued)

(i) Subsidiaries (continued)

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value, with changes in fair value recognised in profit or loss.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognised in profit or loss.

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

The Group applies predecessor accounting to account for business combinations under common control. Under predecessor accounting, assets and liabilities acquired are not restated to their respective fair values. They are recognised at the carrying amounts from the consolidated financial statements of the ultimate holding company of the Group and adjusted to conform with the accounting policies adopted by the Group. The difference between any consideration given and the aggregate carrying amounts of the assets and liabilities of the acquired entity is recognised as an adjustment to equity. No additional goodwill is recognised.

The acquired entity's results, assets and liabilities are consolidated as if both the acquirer and acquiree had always been combined. Consequently, the consolidated financial statements reflect both entities' full year's results. The comparative information is restated to reflect the combined results of both entities.

The potential cash payments related to put options issued by the Group over the equity of subsidiaries are accounted for as financial liabilities. The amount of financial liabilities is recognised initially at the present value of the estimated redemption amount with a corresponding charge directly to equity where the risks and rewards of ownership of the equity interests remained with the NCI. The charge to equity is recognised separately as written put options over NCI.

Such options are subsequently measured at amortised cost, using the effective interest rate method, in order to accrete the liability up to the amount payable under the option at the date at which it becomes exercisable. Gains or losses arising from subsequent measurement are recognised directly in equity. In the event that the option expires unexercised, the liability is derecognised with a corresponding adjustment to equity.

3. MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)

(a) Economic entities in the Group (continued)

(ii) Associates and joint arrangements

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting.

Joint arrangements investments in joint arrangements are classified as either joint operations or joint ventures. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement.

Investments in associates and joint arrangements are accounted for using the equity method of accounting, after initially being recognised at cost.

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in profit or loss, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates and joint ventures are recognised as a reduction in the carrying amount of the investment.

Where the Group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealised gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity-accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group.

(iii) Changes in ownership interests

The Group treats transactions with NCI that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and NCI to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to NCI and any consideration paid or received is recognised in retained earnings within equity attributable to owners.

3. MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)

(a) Economic entities in the Group (continued)

(iii) Changes in ownership interests (continued)

When the Group ceases to consolidate or equity account for an investment because of a loss of control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in a joint venture or an associate is reduced but joint control or significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate.

(b) Intangible assets ("IA")

(i) Goodwill

The Group recognised goodwill based on partial goodwill method. Goodwill represents the excess of the cost of acquisition of subsidiaries over the Group's share of the fair value of the identifiable net assets including contingent liabilities of subsidiaries at the date of acquisition and fair value of any pre-existing equity interest in the subsidiaries. Any shortfall is recognised in profit or loss.

Goodwill on acquisition of subsidiaries is included in IA. Goodwill is not amortised, but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units ("CGU") or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes, being the operating segments.

As the Group recognises goodwill based on a partial goodwill method, for the purposes of impairment testing, goodwill includes the portion attributable to the NCI. The Group adopted the method of using NCI based on the current ownership interests as at the date of the goodwill impairment test.

3. **MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)**

(b) **Intangible assets ("IA") (continued)**

(ii) **Licences**

The Group's licences mainly consist of acquired telecommunication licences with allocated spectrum rights and tower operating licences. Acquired licences are shown at cost. Licences acquired in a business combination are recognised at fair value at the acquisition date. Licences have finite useful lives and are carried at cost less accumulated amortisation. Amortisation is calculated using straight-line method, from the effective date of commercialisation of services, subject to impairment, to the end of the assignment period. Licences are not revalued. The estimated useful lives of the acquired telecommunication licences with allocated spectrum rights and tower operating licence of the Group are as follows:

| | |
|------------|---------------|
| Indonesia | 4 - 10 years |
| Sri Lanka | 5 - 10 years |
| Bangladesh | 10 - 18 years |
| Cambodia | 25 years |

(iii) **Customer contracts and the related relationship**

Customer contracts and the related customer relationship arose from the acquisition of subsidiaries. The customer contracts and the related relationships are shown at fair value on acquisition of a subsidiary and subsequently subject to amortisation over the useful life. The customer contracts and the related customer relationships are tested for impairment whenever indication of impairment exists. The estimated useful lives of the customer contracts and related relationship are as follows:

| | |
|------------------------|----------|
| Infrastructure segment | 20 years |
|------------------------|----------|

(iv) **Brands**

Separately acquired brands are shown at historical cost. Brands acquired in a business combination are recognised at fair value at the acquisition date. Brands have a finite useful life and are carried at cost less accumulated amortisation and accumulated losses, if any. Amortisation is calculated using the straight-line method to allocate the cost of brands over their estimated useful lives as follows:

| | |
|-----------------|----------|
| Mobile segment: | |
| - Cambodia | 25 years |

(b) **Intangible assets ("IA") (continued)**

(v) **Computer software**

Costs associated with maintaining computer software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Group are recognised as IA.

Directly attributable costs that are capitalised as part of the software product include the software development employee costs and an appropriate portion of relevant overheads.

Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in subsequent period.

Software under development is capitalised only after technical and commercial feasibility of the asset has been completed and able to generate future economic benefits.

Computer software development costs recognised as assets are amortised from the point at which the asset is ready for use over their estimated useful lives, which does not exceed five (5) years.

(c) **Property, plant and equipment ("PPE")**

PPE is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

PPE are depreciated on the straight-line method to allocate the cost of the assets to their residual values over their estimated useful lives in years, summarised as follows:

| | |
|-------------------------------------|--------------|
| Buildings | 8 - 40 years |
| Telecommunication network equipment | 2 - 30 years |
| Movable plant and equipment | 3 - 10 years |
| Computer support systems | 2 - 10 years |

3. MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)

(c) Property, plant and equipment ("PPE") (continued)

Depreciation on assets under construction or capital work-in-progress commence when the assets are ready for their intended use. Depreciation on PPE ceases at the earlier of derecognition or classification as held for sale.

Residual values and useful lives of assets are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss. When revalued assets are sold, it is group policy to transfer any amounts included in other reserves in respect of those assets to retained earnings.

(d) Investments in subsidiaries, associates and joint ventures in separate financial statements

In the Company's separate financial statements, investments in subsidiaries, associates and joint ventures are stated at cost less accumulated impairment losses.

Where an indication of impairment exists, the carrying amount of the investment is assessed and written down immediately to its recoverable amount. The accounting policy on impairment of non-financial assets is disclosed in Note 3(e) to the financial statements.

On disposal of investments in subsidiaries, associates and joint ventures, the difference between the disposal proceeds and the carrying amounts of the investments are recognised in profit or loss. Disposal-related costs are expensed as incurred.

The amounts due from subsidiaries of which the Company does not expect repayment are considered as quasi-investments as part of the Company's investments in the subsidiaries. Upon classification as quasi-investments, the subsidiaries do not have contractual obligation to repay the Company.

(e) Impairment of non-financial assets

Goodwill and IA that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal ("FVLCTS") and value in use ("VIU"). For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

(f) Financial assets

(i) Classification

The Group and the Company classify the financial assets in the following measurement categories:

- those to be measured subsequently at fair value either through OCI or through profit or loss, and
- those to be measured at amortised cost.

The classification depends on the Group's and the Company's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Group and the Company have made an irrevocable election at the time of initial recognition account for the equity investment at FVTOCI.

The Group and the Company reclassify debt investments when business model for managing those assets changes.

(ii) Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade date, being the date on which the Group and the Company commit to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group and the Company have transferred substantially all the risks and rewards of ownership.

(iii) Measurement

At initial recognition, the Group and the Company measure a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss ("FVTPL"), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed off in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

(f) Financial assets (continued)

(iii) Measurement (continued)

Debt instruments

Subsequent measurement of debt instruments depends on the Group's and the Company's business model for managing the asset and the cash flow characteristics of the asset. The Group and the Company classify the debt instruments at amortised cost which are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost.

Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss. Impairment losses are presented as a separate line in statements of comprehensive income.

Equity instruments

The Group and the Company subsequently measure all equity investments at fair value. Where the Group's and the Company's management have elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investments.

Changes in the fair value of financial assets at FVTPL are recognised in the profit or loss within "Other (losses)/gains – net" as applicable whereas changes in the fair value of financial assets at FVTOCI are recognised in OCI. Impairment losses (and reversal of impairment losses) on equity investments measured at FVTOCI are not reported separately from other changes in fair value.

(iv) Impairment of financial assets

The Group and the Company assess on a forward-looking basis the expected credit losses ("ECL") associated with its debt instruments carried at amortised cost and FVTOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

The Group has five (5) types of financial instruments that are subject to the ECL model:

- Trade receivables
- Finance lease receivables
- Accrued lease receivables
- Contract assets
- Other receivables (including deposits)

(f) Financial assets (continued)

(iv) Impairment of financial assets (continued)

The Company has four (4) types of financial instruments that are subject to the ECL model:

- Trade receivable
- Other receivables (including deposits)
- Amount due from subsidiaries
- Financial guarantee contracts

While cash and cash equivalents are also subject to the impairment requirements of MFRS 9, the identified impairment loss was immaterial.

ECL represents a probability-weighted estimate of the difference between present value of cash flows according to the contracts and present value of cash flows the Group and the Company expect to receive, over the remaining life of the financial instruments.

The measurement of ECL reflects:

- an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and
- reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

Simplified approach - accrued lease receivables, finance lease receivables, trade receivables and contract assets within the scope of MFRS 15

The Group applies the MFRS 9 simplified approach to measure ECL, which uses a lifetime ECL for accrued lease receivables, finance lease receivables, trade receivables and contract assets within the scope of MFRS 15. The measurement details of ECL are disclosed in Note 34(f) to the financial statements.

General 3-stage approach for all other financial instruments

At each reporting date, the Group and the Company measure loss allowance at an amount equal to twelve (12) months ECL if credit risks of the financial assets have not increased significantly since initial recognition. For all other financial instruments, a loss allowance at an amount equal to lifetime ECL is required. The measurement details of ECL are disclosed in Note 33 and Note 34(f) to the financial statements.

(f) Financial assets (continued)

(iv) Impairment of financial assets (continued)

Significant increase in credit risk

The Group and the Company consider the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk, the Group and the Company compare the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. The Group and the Company consider available reasonable and supportable forward-looking information.

The following indicators are incorporated:

- internal credit rating
- actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the debtor's ability to meet its obligations
- actual or expected significant changes in the operating results of the debtor
- significant changes in the expected performance and behaviour of the debtor, including changes in the payment status of debtor in the Group and changes in the operating results of the debtor.

Macroeconomic information (such as market interest rates or growth rates) is incorporated as part of the internal rating model.

Regardless of the analysis above, a significant increase in credit risk is presumed if a debtor is more than thirty (30) to ninety (90) days past due in making a contractual payment.

Definition of default and credit-impaired financial assets

The Group and the Company define a financial instrument as default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

| | |
|------------------------|--|
| Quantitative criteria: | When the counterparty fails to make contractual payments within ninety (90) days to three hundred and sixty-five (365) days after they fall due. |
|------------------------|--|

(f) Financial assets (continued)

(iv) Impairment of financial assets (continued)

Definition of default and credit-impaired financial assets (continued)

Qualitative criteria: The debtor meets unlikelihood to pay criteria, which indicates the debtor is in significant financial difficulty. The Group and the Company consider the following instances:

- the debtor is in breach of financial covenants;
- concessions have been made by the lender relating to the debtor's financial difficulty;
- it is becoming probable that the debtor will enter bankruptcy or other financial reorganisation; or
- the debtor is insolvent.

Financial instruments that are credit-impaired are assessed on individual basis.

Groupings of instruments of ECL:

- Collective assessment

To measure ECL, trade receivables and contract assets have been grouped based on shared credit risk characteristics and of customer's behaviour and the days past due. Contract assets relate to unbilled work in progress and have substantially the same risk characteristics as the trade receivables for the same types of contracts. The Group has therefore concluded that the expected loss rates for trade receivables are a reasonable approximation of the loss rates for the contract assets.

- Individual assessment

Trade receivables, contract assets, accrued lease receivables, finance lease receivables and other receivables which are in default or credit-impaired or have individually significant balances, are assessed separately for ECL measurement.

Amounts due from subsidiaries in the Company's separate financial statements are assessed on individual basis for ECL measurement, as credit risk information is obtained and monitored based on individual balances.

(g) Derivatives and hedging activities

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value at the end of each reporting period. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Group designates certain derivatives as hedges of a particular risk associated with a recognised asset or liability or a highly probable forecast transaction (cash flow hedge).

3. MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)

(g) Derivatives and hedging activities (continued)

At inception of the hedge relationship, the Group and the Company document the economic relationship between hedging instruments and hedged items including whether changes in the cash flows of the hedging instruments are expected to offset changes in the cash flows of hedged items. The Group and the Company document its risk management objective and strategy for undertaking its hedge transactions.

The fair values of various derivative instruments used for hedging purposes are disclosed in Note 18 to the financial statements. Movements on the hedging reserve in OCI are shown in the statement of changes in equity. The full fair value of a hedging derivative is classified as non-current asset or liability when the final maturity date is beyond twelve (12) months after the end of the reporting period and as a current asset or liability when the final maturity date is less than twelve (12) months after the reporting date. Trading derivatives are classified as a current asset or liability.

(i) Cash flow hedge

The effective portion of changes in the fair value of derivatives that are designated and qualified as cash flow hedges is recognised in OCI and accumulated in reserves within equity. The gain or loss relating to the ineffective portion is recognised immediately in the profit or loss within "Other (losses)/gains – net".

When forward contracts are used to hedge forecast transactions, the Group generally designates only the change in fair value of the forward contract related to the spot component as the hedging instrument. Gains or losses relating to the effective portion of the change in the spot component of the forward contracts are recognised in the cash flow hedge reserve within equity. The change in the forward element of the contract that relates to the hedged item ('aligned forward element') is recognised within OCI in the costs of hedging reserve within equity. In some cases, the entity may designate the full change in fair value of the forward contract (including forward points) as the hedging instrument. In such cases, the gains or losses relating to the effective portion of the change in fair value of the entire forward contract are recognised in the cash flow hedge reserve within equity.

Amounts accumulated in equity (including the cost of hedging reserve) are reclassified to profit or loss in the periods when the hedged cash flows affect the profit or loss.

When a hedging instrument expires or is sold, or when a hedge no longer meets the effectiveness criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the hedged cash flows affect profit or loss.

(ii) Certain derivative instruments do not qualify for hedge accounting.

Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognised immediately in profit or loss and are included in "Other (losses)/gains – net".

(h) Inventories

Inventories are stated at lower of cost and net realisable value. Certain items such as spare parts, stand-by equipment and servicing equipment are recognised as PPE when they meet the definition of PPE under MFRS 116. Otherwise, the items are classified as inventory. Cost is determined on a weighted average basis and comprises all cost of purchase and other direct costs incurred in bringing the inventories to their present location. Net realisable value represents the estimated selling price in the ordinary course of business, less all estimated costs to completion and applicable variable selling expenses. In arriving at the net realisable value, due allowance is made for all obsolete and slow-moving items.

(i) Trade and other receivables

Trade receivables are recognised initially at the amount of consideration that is unconditional, unless they contain significant financing components when they are recognised at fair value. They are subsequently measured at amortised cost using the effective interest method, less loss allowance.

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. Other receivables generally arise from transactions outside the usual operating activities of the Group and the Company. If collection is expected in one (1) year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. Otherwise, they are presented as non-current assets.

Deposits paid to avoid possible penalties in relation to litigation and arbitration cases where provisions have not been recognised are accounted for as assets on the basis that there is a right to obtain future economic benefits, either by receiving a cash refund or by using the payment to settle future liabilities. At initial recognition, the Group and the Company measures the deposits at fair value. Subsequent to initial recognition, the Group and the Company measures the deposits at FVTPL at each reporting period taking into account the probability of any outflow of future economic benefits for the disputed amount.

(j) Cash and cash equivalents

Cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three (3) months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are included within "Borrowings" in current liabilities in the statements of financial position.

(k) Trade and other payables

These amounts represent liabilities for goods and services provided to the Group prior to the end of the financial year which are unpaid. Trade and other payables are presented as current liabilities unless payment is not due within twelve (12) months after the reporting period. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

(l) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are removed from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss as other income or finance costs. Borrowings are classified as current liabilities unless the Group and the Company have an unconditional right to defer settlement of the liability for at least twelve (12) months after the reporting period.

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings, pending their expenditure on qualifying assets, is deducted from the borrowing costs eligible for capitalisation. Other borrowing costs are expensed in the period in which they are incurred.

When the basis to determine the future contractual cash flows of the borrowings are modified entirely as a result of interbank lending rate ("IBOR") reform, the Group and the Company apply the practical expedient provided by the Phase 2 amendments related to IBOR reform to adjust the effective interest rate of the borrowings, with no immediate gain or loss is recognised.

The practical expedient is only applicable to changes to the basis for determining the contractual cash flows that are required by IBOR reform when both of these conditions are met:

- (a) the change is necessary as a direct consequence of IBOR reform; and
- (b) the new basis for determining the contractual cash flows is economically equivalent to the previous basis (that is, the basis immediately preceding the change).

In situations where some or all of a change in the basis for determining the contractual cash flows of the borrowings does not meet the criteria of the Phase 2 amendments, the Group and the Company first apply the practical expedient to the changes required by IBOR reform, including updating the effective interest rate of the borrowings. Any additional changes are accounted for as modification of borrowings in accordance with the requirement in MFRS 9 (that is, assessed for modification or derecognition, with the resulting modification gain / loss recognised immediately in profit or loss where the borrowings are not derecognised).

(m) **Income tax**

The income tax expense or credit for the period is the tax payable on the current period's taxable income, based on the applicable income tax rate for each jurisdiction, adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The Group measures its tax balances either based on the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty.

Certain jurisdiction of which the Group operates in specifies a minimum amount of tax that is payable, calculated based on the higher of a percentage of gross receipt, tax deductible at source and current income tax charge. The Group recognises the current income tax charge as tax expenses and treats any excess as other taxes within "Other income/(expense) – net".

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that, at the time of the transaction, affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in foreign operations where the company is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset where there is a legally enforceable right to offset current tax assets and liabilities and where the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(n) Provisions

Provisions for legal claims, service warranties and make good obligations are recognised when the Group and the Company have a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognised for future operating losses.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as finance cost.

Provision for asset retirement refers to provisions for dismantling, removal or restoration of identified sites recorded as PPE or right-of-use ("ROU") assets. Provisions are reviewed at the end of the reporting period and adjusted to PPE or ROU assets or profit or loss to reflect the current best estimation. Where the time value of money is material, the amount of a provision is the present value of the future period expenditure expected to be required to settle the obligation.

(o) Share capital

(i) Classification

Ordinary shares and non-redeemable preference shares with discretionary dividends are classified as equity. Other shares are classified as equity and/or liability according to the economic substance of the contractual arrangement of the particular instrument.

(ii) Share issue expenses

Incremental costs directly attributable to the issuance of new shares are shown in equity as a deduction, from the proceeds.

(iii) Dividends to shareholders of the Company

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the Company, on or before the end of the reporting period but not distributed at the end of the reporting period.

(p) Leases

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payments that are based on an index or a rate, initially measured using the index or rate as at the commencement date; and
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option.

3. MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)

(p) Leases (continued)

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability;
- any lease payments made at or before the commencement date less any lease incentives received;
- any initial direct costs; and
- restoration costs.

Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices.

Lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Group and the Company, the lessee's incremental borrowing is used. This is the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the ROU asset in a similar economic environment with similar term, security and conditions.

ROU assets are subsequently measured at cost, less accumulated depreciation and impairment loss (if any). The ROU assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group and the Company are reasonably certain to exercise a purchase option, the ROU assets are depreciated over the underlying asset's useful life. In addition, the ROU assets are adjusted for certain remeasurement of the lease liabilities.

Short-term leases are leases with a lease term of twelve (12) months or less. Low-value assets comprise information technology ("IT") equipment and small items of office furniture. Payments associated with short-term leases of equipment and vehicles and all leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss.

(q) Revenue

(i) Revenue from contracts with customers

The Group principally generates revenue from mobile services such as call time, messaging, data services, activation fee and sales of prepaid starter packs, interconnect services, sale of devices and others such as pay television transmission, broadband and infrastructure management services.

(q) Revenue (continued)

(i) Revenue from contracts with customers (continued)

Mobile and interconnect services and sale of devices

The Group recognises revenue when a contractual performance obligation is fulfilled by transferring control over the promised services or products to a customer provided that collectability of the consideration is probable. Revenue is measured based on the transaction price i.e. the consideration agreed in the contract with the customer excluding amounts collected on behalf of third parties such as sales taxes. In determining the transaction price, the Group considers variable and non-cash consideration such as rebates or discounts and consideration payable to a customer such as refunds to the extent that it is highly probable that a significant reversal will not occur.

The Group recognises mobile and interconnect services revenue when services are rendered.

Customer activation fees that are not considered as a separate performance obligation are recognised as contract liabilities and are recognised as revenue over the contracted period or period where services are transferred to customers.

Sales of prepaid starter packs with a SIM card and preloaded credits are accounted for as one performance obligation as the SIM card cannot be used on its own. Consideration received for prepaid credits is initially recognised as contract liability and recognised as revenue upon usage by the customer. Any credits not used are recognised in full upon expiry or customer churn, whichever is earlier.

Revenue from sales of device is recognised at the point of time upon delivery and acceptance of the device by the customers where the control is being transferred to the customers.

Mobile services are offered separately and/or as a bundle along with other services and/or devices. The length of bundled contracts is usually between twelve (12) to twenty-four (24) months. For bundled contracts, the Group accounts for individual products and services separately if they are distinct i.e. if a product or service is separately identifiable from other items in the bundled contract and if customers can benefit from it. Revenue is recognised on fulfilment of the individual obligations to the customer.

The total transaction price of bundled contracts is allocated among the individual performance obligations based on their relative stand-alone selling prices. The stand-alone selling prices are determined based on the observable price at which the Group sells the products and services on a stand-alone basis. For products and services that are not sold separately, the Group estimates stand-alone selling prices using other methods such as adjusted market assessment approach, cost plus margin approach or residual approach. As a result, revenue to be recognised for products (often delivered in advance) such as mobile devices that are sold at a subsidised price in a bundled contract with services is higher than the amount billed for the device, resulting in the recognition of contract assets. Contract assets are reversed and reduced over the remaining contract period.

(q) Revenue (continued)

(i) Revenue from contracts with customers (continued)

For devices sold in bundled contracts, the consideration for the device can either be paid upfront or by instalments over the contract period. If the consideration is to be paid by instalment, the contract contains a significant financing component. The consideration will be adjusted for the effects of the financing component as finance income. For contracts with a length of less than twelve (12) months, the Group applies the practical expedient to not adjust the promised amount of consideration for the effects of significant financing component.

Digital business

Mobile advertising

The Group offers mobile advertising through SMS, MMS and display channel. The Group sells the mobile advertising slots to the customers. Revenue is recognised as a single performance obligation at a point in time when the advertising slots are transferred to the customer.

Web channel network income

Web channel network income consists of media buying and campaign management.

Under media buying, the Group purchases advertising slots or space from media companies and provide them to customers for their advertising requirements. Performance obligations are satisfied and revenue is recognised at a point in time when the advertising slots are successfully transferred to the customers.

Under campaign management, the Group provides consultation services to manage customers' advertising mix based on the insights generated from different digital platforms. Performance obligations are satisfied and revenue is recognised over time as customers simultaneously consume the benefits of the data analysis and insights provided by the Group and the Company over the respective contract periods.

Billings are typically issued to customers on a periodic basis based on intervals agreed within each customer contract, with credit terms of thirty (30) days. Certain contracts require customers to pay consideration in advance of the Group and the Company fulfilling the performance obligations, for which contract liabilities will be recognised.

Some contracts include multiple deliverables, such as content creation, content strategy and campaigns, which may include both media buying and campaign management performance obligations. In most cases, the customer can benefit from each content deliverable on its own and each deliverable could also be performed separately by another party, therefore it is accounted for as a separate performance obligation. The transaction price will be allocated to each performance obligation based on the stand-alone selling prices and recognised accordingly when the performance obligations are satisfied.

(q) Revenue (continued)

(i) Revenue from contracts with customers (continued)

Television transmission and broadband services

Each subscription to a contract for television transmission or broadband includes the provision of services, connection and devices such as set-top boxes and routers. The provision of set-top boxes, routers and connection fees are for the exclusive use of the Group's services and do not represent distinct services or goods. Therefore, the services and devices are accounted for as a single performance obligation satisfied over time. Revenue is recognised over the period the service is rendered or contract period whichever is earlier.

Technical and management services fees

Technical and management services fees comprise fees for provision of support services to certain subsidiaries, which are recognised over the period the service is rendered.

Infrastructure services

The Group generally enters into master services agreements with its customers for infrastructure leasing and related services which comprise multiple elements that are distinct and delivered separately. The total transaction price is allocated to the tower leasing, maintenance and energy services based on the relative stand-alone selling prices. For provision of services including maintenance and energy services, other services and technical and operations support services, the Group recognises as revenue as and when services are rendered. These performance obligations are generally met over time as customer simultaneously receives and consumes benefits of services as and when the services are performed by the Group.

Managed services

Managed services comprise fees for provision of managed and information technology services, which are recognised over the period the services are rendered. Revenue from the managed services is recognised monthly on a straight-line basis based on agreements with customers. Revenue received in advance is recorded as deferred revenue and is recognised as revenue when the services are provided.

(ii) Lease of passive infrastructure

Revenue comprises the fair value of the consideration received or receivable for the sale of products and rendering of services net of returns, duties, sales discounts and sales taxes paid, after eliminating sales within the Group.

Lease revenue is generated from the leasing of space on the Group's telecommunication towers, where the customers install and maintain their individual communication network equipment. Lease revenue from operating lease is recognised on a straight-line basis over the fixed and non-cancellable term of the lease agreement, irrespective of when payments are due.

(iii) Interest income

Interest income is calculated by applying the effective interest rate to the gross carrying amount of the financial assets except for financial assets that subsequently become credit-impaired. For credit-impaired financial assets, the effective interest rate is applied to the net carrying amount of the financial assets after deduction of the loss allowance, if any.

(iv) Dividend income

Dividend income from investments in subsidiaries, joint ventures, associates and other investments is recognised in the profit or loss in separate financial statements when a right to receive payment is established. This applies even if they are paid out of pre-acquisition profits.

Dividend income from financial assets at FVTPL is recognised in the profit or loss within "Other (losses)/gains – net". Dividend income from financial assets at FVTOCI is recognised in the profit or loss within "Other income – net".

(r) Employee benefits

(i) Short term employee benefits

Wages, salaries, paid annual leave and sick leave, bonuses, and non-monetary benefits that are expected to be settled wholly within twelve (12) months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented within "Trade and other payables" in the statements of financial position.

(ii) Contribution to Employees Provident Fund ("EPF")

The Group's and the Company's contributions to EPF are charged to the profit or loss in the period to which they relate. Once the contributions have been paid, the Group and the Company have no further payment obligations. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

(iii) Termination benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits at the earlier of the following dates: (a) when the Group can no longer withdraw the offer of those benefits; and (b) when the entity recognises costs for a restructuring that is within the scope of MFRS 137 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than twelve (12) months after the end of the reporting period are discounted to their present value.

(iv) Share-based compensation

The Group and the Company operate a number of equity-settled and cash-settled share-based compensation plans. For equity-settled share-based compensation plans, the entity receives services from employees as consideration for equity instruments of the Company and certain subsidiaries. The fair value of the shares granted in exchange for the services of the employees are recognised as equity-settled share-based compensation expense within "Staff costs" in profit or loss with a corresponding increase to share-based payment reserve within equity. The total amount to be expensed is determined by reference to the fair value of the shares granted:

- including any market performance conditions;
- excluding the impact of any service and non-market performance vesting conditions; and
- including the impact of any non-vesting conditions.

Non-market vesting conditions and service conditions are included in assumptions about the number of shares that are expected to vest.

The fair value of shares granted to employees under the equity-settled share-based compensation plans of the Group and the Company is recognised as an expense over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied. At the end of the reporting period, the Group and the Company revise its estimates of the number of shares that are expected to vest based on the non-market vesting conditions and service conditions. It recognises the impact of the revision to original estimates, if any, in profit or loss, with a corresponding adjustment to share-based payment reserve within equity. On vesting date, the Group and the Company revise the estimate to equal the number of shares that ultimately vested based on the non-market vesting conditions and service conditions.

Having recognised the services received, the Group and the Company make no subsequent adjustment to total equity after vesting date. If the shares are later forfeited by an employee or lapse in accordance with the terms of the share-based compensation plans, the Group and the Company recognise a transfer from the share-based payment reserve to retained earnings within equity.

For cash settled share-based compensation plans, the Group measures the employee services acquired and the liability incurred at the fair value of the liability. Until the liability is settled, the Group remeasures the fair value of the liability at the end of each reporting period and at the date of settlement, with any changes in fair value recognised in profit or loss for the period.

In the separate financial statements of the Company, the grant by the Company of its shares to the employees of subsidiaries in the Group is treated as services provided to the subsidiaries. The fair value of shares granted to employees of the subsidiaries in exchange for the services of the employees to the subsidiaries are recognised as payables by subsidiaries, with a corresponding credit to the share-based payment reserve in equity.

(r) Employee benefits (continued)

(v) Post-employment benefit obligations

The Group operates various defined benefit plans in accordance with local conditions and practices in the countries in which it operates. The plans are generally funded through payments to insurance companies or trustee-administrated funds, determined by periodic actuarial calculations. A defined benefit plan is a pension plan that is not a defined contribution plan. Defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The liability recognised in the statements of financial position in respect of defined benefit pension plans is the present value of the defined obligation at the end of the reporting period less the fair value of plan assets, together with adjustments for actuarial gains or losses and unrecognised past service costs.

The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash flows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximately to the terms of related pension obligation. In countries where there is no deep market in such bonds, the market rates on government bonds are used.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions, are charged or credited in OCI in the period in which they arise and will not be reclassified to profit or loss.

Past-service costs are recognised immediately in profit or loss within "Staff costs".

The current service cost of the defined benefit plan reflects the increase in the defined benefit obligation resulting from employee service in the current year. It is recognised in profit or loss in employee benefit expense, except where included in the cost of an asset.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in profit or loss within "Finance costs".

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in profit or loss as past service costs.

(vi) Cash-Based Long-Term Incentive ("LTI") compensation

The Group recognises a liability and an expense for LTI and over the vesting period, based on a formula that takes into consideration the number of employees, a performance multiplier and discount rate. Provision is recognised when the Group has a present legal or constructive obligation as a result of past events.

(s) Foreign currencies

(i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in RM, which is the Company's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates, are generally recognised in profit or loss. They are deferred in equity if they relate to qualifying cash flow hedges and qualifying net investment hedges or are attributable to part of the net investment in a foreign operation.

Foreign exchange gains and losses that relate to borrowings are presented in the statement of profit or loss, within finance costs. All other foreign exchange gains and losses are presented in the statement of profit or loss on a net basis within "Other (losses)/ gains – net".

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equities held at fair value through profit or loss are recognised in profit or loss as part of the fair value gain or loss, and translation differences on non-monetary assets such as equities classified as at fair value through other comprehensive income are recognised in other comprehensive income.

(iii) Group companies (Consolidated financial statements)

The results and financial position of foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- income and expenses for each statement of profit or loss and statement of comprehensive income are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- all resulting exchange differences are recognised in other comprehensive income.

(s) Foreign currencies (continued)

(iii) Group companies (Consolidated financial statements) (continued)

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities, and of borrowings and other financial instruments designated as hedges of such investments, are recognised in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investment are repaid, the associated exchange differences are reclassified to profit or loss, as part of the gain or loss on sale.

(t) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker ("CODM"). The CODM, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions for the Group and the Company.

(u) Government grants

As a Universal Service Provider ("USP"), the Group is entitled to claim certain qualified expenses from the relevant authorities in relation to USP projects. Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions.

Government grants relating to costs are recognised in the profit or loss over the period necessary to match them with the costs they are intended to compensate.

Government grants relating to the purchase of assets are included in non-current liabilities as deferred income and are credited to the profit or loss on the straight-line basis over the expected life of the related assets.

(v) Non-current assets (or disposal groups) classified as held for sale and discontinued operations

Non-current assets (or disposal groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and investment property that are carried at fair value and contractual rights under insurance contracts, which are specifically exempt from this requirement.

An impairment loss is recognised for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset (or disposal group) is recognised at the date of derecognition.

- (v) Non-current assets (or disposal groups) classified as held for sale and discontinued operations (continued)

Non-current assets (including those that are part of a disposal group) are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the statement of financial position. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the statement of financial position.

A discontinued operation is a component of the entity that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the statement of profit or loss.

- (w) Contract cost assets

Contract cost assets comprise the incremental costs of obtaining a contract (mainly sales commission paid to dealers) and the costs to fulfil a contract. These costs are capitalised if it can be assumed that the costs will be compensated by future revenue from the contract. Incremental costs of obtaining a contract are additional costs that would have not been incurred had the contract not been concluded. Costs to fulfil a contract are costs relating directly to a contract that are incurred after contract inception and serve the purpose of fulfilling the contract but are incurred prior to fulfilment and cannot be capitalised under any other standard. The Group has elected the practical expedient to recognise contract costs incurred related to contracts with an amortisation period of less than one year as an expense when incurred.

The capitalised contract cost assets are amortised on a systematic basis that is consistent with the transfer to the customer of the goods or services to which the asset relates.

- (x) Financial guarantee contracts

Financial guarantee contracts are recognised as a financial liability at the time the guarantee is issued. The liability is initially measured at fair value and subsequently at the higher of:

- the amount determined in accordance with the expected credit loss model under MFRS 9, and
- the amount initially recognised less, where appropriate, the cumulative amount of income recognised in accordance with the principles of MFRS 15.

(x) Financial guarantee contracts (continued)

The fair value of financial guarantees is determined based on the present value of the difference in cash flows between the contractual payments required under the debt instrument and the payments that would be required without the guarantee, or the estimated amount that would be payable to a third party for assuming the obligations.

Changes in the fair value of the financial guarantees are recognised in the profit or loss within "Other (losses)/gains – net" as applicable.

Where financial guarantees in relation to loans or payables of subsidiaries are provided by the Company for no compensation, the fair values are accounted for as contributions and recognised as part of the cost of investment in subsidiaries.

(y) Contingent liabilities and contingent assets

The Group and the Company do not recognise a contingent liability but disclose its existence in the financial statements. A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group and the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in the extremely rare circumstance where there is a liability that cannot be recognised because it cannot be measured reliably.

A contingent asset is a possible asset that arises from past events whose existence will be confirmed by one or more uncertain future events beyond the control of the Group and the Company. The Group and the Company do not recognise a contingent asset but disclose its existence where inflow of economic benefit is probable, but not virtually certain.

In the acquisition of subsidiaries by the Group under a business combination, the contingent liabilities assumed are measured initially at their fair values at the acquisition date, irrespective of the extent of any NCI.

The Group recognises separately the contingent liabilities of the acquirees as part of allocating the cost of a business combination where their fair values can be measured reliably. Where the fair values cannot be measured reliably, the resulting effect will be reflected in the goodwill arising from the acquisition.

Subsequent to the initial recognition, the Group measures the contingent liabilities that are recognised separately at the date of acquisition at the higher of the amount that would be recognised in accordance with the provisions of MFRS 137 and the amount initially recognised less, when appropriate, cumulative amortisation recognised in accordance with MFRS 15.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgements are continually evaluated by the Directors and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

(a) Critical judgements in applying the Group's and the Company's accounting policies

In determining and applying accounting policies, judgement is often required in respect of items where the choice of specific policy could materially affect the reported results and financial position of the Group and the Company. The following accounting policies require subjective judgements, often as a result of the effect of matters that are inherently uncertain.

(i) IA – estimated useful life of telecommunication licences with allocated spectrum rights

The telecommunication licences with allocated spectrum rights acquired by a subsidiary via business combination are not subject to amortisation and are tested annually for impairment as the Group is of the opinion that the licences can be renewed in perpetuity at negligible cost and the associated spectrum rights, have an indefinite economic useful life. The estimated indefinite economic useful life reflects the Group's expectation of the period over which the Group will continuously recover the benefits from the licences.

(ii) Legal, regulatory and taxation claims and disputes

There are a number of ongoing legal, regulatory and taxation claims and disputes across the Group. The accounting treatment of these matters is based on the Group's view of the expected outcome of these contingencies. These outcomes are assessed in consultation with legal counsel for litigation cases and internal and external experts of the Group for matters in the ordinary course of business. Provisions are recorded if it is probable that an outflow of economic benefits will be required to settle the obligation and the amount can be estimated reliably.

The outcome of ongoing legal, regulatory and taxation claims and disputes are dependent on future events and the Group makes estimates and judgements concerning these future events. The Group may be required to increase or decrease provisions for such matters due to unanticipated events and circumstances that occur during the financial year.

The ongoing legal, regulatory and taxation claims and disputes of the Group as at reporting date are disclosed in Note 38(d) to the financial statements.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONTINUED)

Estimates and judgements are continually evaluated by the Directors and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. (continued)

(a) Critical judgements in applying the Group's and the Company's accounting policies (continued)

In determining and applying accounting policies, judgement is often required in respect of items where the choice of specific policy could materially affect the reported results and financial position of the Group and the Company. The following accounting policies require subjective judgements, often as a result of the effect of matters that are inherently uncertain. (continued)

(iii) Assets and liabilities of a disposal group no longer classified as held for sale

The Group has reassessed and concluded that the proposed exit from the infrastructure segment in Myanmar based on existing terms and conditions of the share purchase agreement ("SPA") is no longer highly probable under MFRS 5 "Non-current Assets Held for Sale and Discontinued Operations" given the proposed transaction has yet to obtain certain regulatory approvals in Myanmar. The SPA lapses on 4 April 2025.

The details are disclosed in Note 37 to the financial statements.

(b) Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. The Group, and to a large extent its activities, are governed by the legal, regulatory and business environment in the countries which the Group operates in and which the Group has investments in. The business of the Group is subject to a number of risks, many of which are beyond the Group's control.

The main risks relating to the Group's business in the countries or regions the Group operates in are as follows:

- Increasing competition in the countries
- Challenges in expanding business in certain emerging markets
- Political, regulatory and social developments in the region
- Significant expansion of capital investments required
- Increasing substitution of traditional voice by data in certain emerging markets

To enhance the information content of the estimates, certain key variables that are anticipated to have material impact to the Group's results and financial position are tested for sensitivity to changes in the underlying parameters. These estimates are based on the Group's best knowledge of current events, historical experience, actions that the Group may undertake in the future and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may be different from these estimates.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONTINUED)

(b) Critical accounting estimates and assumptions (continued)

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next year are mentioned below:

(i) Impairment assessment of goodwill

The Group tests goodwill for impairment annually in accordance with its accounting policy or more frequently if events or change in circumstances indicate that this is necessary within the financial year. Recoverable amount is measured at the higher of the FVLCTS for that asset and its VIU.

These calculations require the use of estimates. The calculations are inherently judgemental and susceptible to change from period to period because they require the Group to make assumptions about revenue growth, Earnings Before Interest, Taxes, Depreciation and Amortisation ("EBITDA") margin, capital expenditure ("capex") to revenue ratio, colocation ratio average, an appropriate discount rate and terminal growth rate.

The assumptions used, results and sensitivity analysis of the impairment assessment of goodwill are disclosed in Note 24 to the financial statements.

(ii) Impairment assessment on non-financial assets (excluding goodwill)

The Group and the Company assess impairment of the assets or CGUs whenever the events or changes in circumstances indicate that the carrying amount of an asset or CGU may not be recoverable i.e. the carrying amount of the asset is more than the recoverable amount. Recoverable amount is measured at the higher of the FVLCTS for that asset or CGU and its VIU.

Projected future cash flows used in impairment testing of the assets or CGUs are based on Group's and Company's estimates calculated using historical, sector and industry trends, general market and economic conditions, changes in technology and other available information.

The recoverable amounts of the asset or CGUs are determined based on VIU or FVLCTS calculations. These calculations require the use of estimates. The calculations are inherently judgemental and susceptible to change from period to period because they require the Group and the Company to make assumptions about revenue growth rate, an appropriate discount rate and terminal growth rate.

The assumptions used, results and sensitivity analysis of the impairment assessment of IA (other than goodwill), PPE, subsidiaries and associates are disclosed in Note 24, Note 26, Note 28 and Note 29 to the financial statements respectively.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONTINUED)

(b) Critical accounting estimates and assumptions (continued)

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next year are mentioned below: (continued)

(iii) Estimated useful lives of PPE

The Group reviews the estimated useful lives of PPE, particularly on its telecommunication network equipment, based on approved network and IT modernisation plans. The network and IT modernisation involve estimating when the telecommunication network equipment will be replaced. Useful lives of assets are revised accordingly. Future operational results could be materially affected by changes in useful lives.

A reduction in the estimated useful lives of PPE would increase the recorded depreciation charge and decrease the PPE balance.

(iv) Taxation

The Group and the Company are subject to income tax in numerous jurisdictions. Judgement is involved in determining the group-wide provision for income taxes. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group and the Company recognise liabilities for tax matters based on estimates of whether additional taxes will be due. If the final outcome of these tax matters results in a difference in the amounts initially recognised, such differences will impact the income tax and/or deferred tax provisions in the period in which such determination is made.

(v) Determination of lease term

In determining the lease term, the Group and the Company consider all the facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

The lease term is reassessed if an option is exercised (or not exercised) or the Group and the Company become obligated to exercise (not to exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurred, which affect this assessment, and that is within the lessee.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (CONTINUED)

(b) Critical accounting estimates and assumptions (continued)

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next year are mentioned below: (continued)

(vi) Provision for asset retirement

Fair value estimates of provision for asset retirement for dismantling, removal or restoration generally involve discounted future cash flows, and periodic accretion of such liabilities due to the passage of time are recorded as finance costs. The significant assumptions used in estimating the provision are timing of assets removals, costs of restorations, expected inflation rates and the discount rates. There can be no assurances that actual costs and the probability of incurring obligations will not differ from these estimates.

(vii) Measurement of ECL assessment

The measurement of ECL allowance for financial assets measured at amortised cost is an area that requires the use of significant assumptions about the future economic conditions and credit behaviour of the customers. Explanation of the inputs, assumptions and estimation techniques used in measuring ECL are disclosed in Note 34 to the financial statements. Areas of significant judgements involved in the measurement of ECL are detailed as follows:

- Determining the number and relative weightage of forward-looking scenarios for the general 3-stage approach

The Group and the Company measure loss allowance at the probability-weighted amount that reflects the possibility of credit loss occurring. This requires forecasts of economic variables and their associated impact on PD ('probability of default'), LGD ('loss given default') and EAD ('exposure at default') which are provided in possible scenarios along with scenario weightings. Probability-weighted ECLs are determined by running each scenario through the relevant ECL model and multiplying it by the appropriate scenario weighting. As with any economic forecasts, the projections and likelihoods of occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different to those projected. The Group and the Company consider these forecasts to represent its best estimate of the possible outcomes and are appropriately representative of the range of possible scenarios.

- Establishing the groupings of similar financial assets and the forward looking information for the purpose of measuring ECL on collective basis

The Group uses a provision matrix to calculate ECLs for trade receivables and contract assets. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns (i.e. customer type and rating).

5. SIGNIFICANT CHANGES IN COMPOSITION OF THE GROUP

(a) Significant changes in composition of the Group during the financial year

(i) Acquisition of equity interest in Bharti Airtel Lanka (Private) Limited ("Airtel Lanka")

On 26 June 2024, Dialog Axiata Plc ("Dialog") completed the acquisition of the entire issued and paid-up capital of Airtel Lanka upon the fulfilment of the conditions as stipulated in the Share Sale Agreement entered with Bharti Airtel Limited ("Bharti Airtel").

The following summarises the non-cash consideration on the acquisition of Airtel Lanka, the fair value of the identified assets acquired, liabilities assumed and NCI on the date of acquisition.

| | Group RM'000 |
|---|-----------------|
| Purchase consideration issued in ordinary shares of Dialog | 162,961 |
| Details of the net identifiable liabilities assumed are as follows: | |
| IA | 39,367 |
| PPE | 127,175 |
| ROU assets | 46,615 |
| Trade and other receivables | 32,330 |
| Cash and bank balances | 5,283 |
| Inventories | 995 |
| Trade and other payables | (114,805) |
| Borrowings | (138,078) |
| Lease liabilities | (52,722) |
| Total net identifiable liabilities assumed | <u>(53,840)</u> |
| Goodwill on acquisition | <u>216,801</u> |

The Group has assessed the fair value of the identified assets acquired and liabilities assumed on the date of acquisition via a purchase price allocation ("PPA") exercise.

The goodwill arising from acquisition is attributable to expected synergies contributed from economies of scale, cost savings and operational efficiencies.

Acquisition related costs of RM0.9 million have been charged to other operating costs in the consolidated profit or loss during the financial year.

Had Airtel Lanka been consolidated from 1 January 2024 until 25 June 2024, consolidated revenue and profit or loss after tax of the Group would have been increased by RM112.0 million and increased by RM202.6 million respectively.

5. SIGNIFICANT CHANGES IN COMPOSITION OF THE GROUP (CONTINUED)

(a) Significant changes in composition of the Group during the financial year (continued)

(i) Acquisition of equity interest in Bharti Airtel Lanka (Private) Limited ("Airtel Lanka") (continued)

Since the acquisition date, revenue amounting to RM102.4 million and loss after tax of RM21.6 million of Airtel Lanka respectively have been included in the consolidated statement of comprehensive income during the financial year.

With the completion of the acquisition, the Group's effective equity interest in Dialog decreased from 82.27% to 73.75%. Accordingly, the Group recognised an increase of RM108.1 million and RM74.1 million in consolidated currency translation differences reserve and non-controlling interest, respectively and a decrease of RM0.6 million and RM181.6 million in consolidated reserves and consolidated retained earnings, respectively.

On 30 August 2024, Dialog amalgamated with Airtel Lanka under the applicable provisions of the Companies Act of Sri Lanka with Dialog remains as the amalgamated company.

(ii) Partial disposal of equity interest in subsidiaries

- Axiata Investments (Indonesia) Sdn Bhd, had on 31 May 2024 completed the disposal of 28,631,954 shares representing 1.05% of PT Link Net Tbk ("Link Net") to PT Sucorinvest Asset Management for a total consideration of IDR27,085.8 million (RM7.8 million). As a result, the Group's effective shareholding in Link Net decreased from 92.83% to 91.78%.
- The Company, had on 28 June 2024 completed the disposal of 682,828 ordinary shares representing 16.71% shareholding in Axiata Digital Services Sdn Bhd ("ADS") to Mitsui & Co., Ltd ("Mitsui") for a total consideration of USD58.3 million (RM275.5 million). Pursuant to the disposal, the Company received a cash consideration of USD55.0 million (RM259.7 million) and a contingent consideration of USD3.3 million (RM15.8 million). As a result, the Group's effective shareholding in ADS decreased from 96.71% to 80.00%.

The Group recognised an increase of RM0.5 million, RM0.1 million, RM189.5 million and RM69.6 million in consolidated currency translation differences reserve, consolidated reserves, consolidated retained earnings and non-controlling interest, respectively.

Other than as disclosed above, the partial disposal above did not have a material impact to the Group during the financial year.

(iii) Accretion of equity interests in subsidiaries

- Dialog Axiata Digital Innovation Fund (Private) Limited ("DADIF"), a subsidiary of Digital Holdings Lanka (Private) Limited ("DHL") issued 123,815 preference shares, of which 123,722 were issued to DHL and the remaining shares were issued to an individual shareholder. Accordingly, the Group's effective equity interest in DADIF increased from 76.72% to 77.52% during the financial year. Following the acquisition of equity interest in Airtel Lanka as disclosed in Note 5(a)(i), the Group's effective equity interest in DADIF decreased from 76.72% to 69.49%.
- PT Creative Mobile Adventure ("CMA"), had:
 - on 29 January 2024 completed the issuance of additional 11,671 Series B shares to Boost Holdings Sdn Bhd ("BHSB") for a total consideration of IDR116,710.0 million (RM34.6 million); and
 - on 11 November 2024 completed the issuance of 1,700 Series C shares to BHSB for a total consideration of IDR29,750.0 million (RM8.4 million).

Accordingly, the Group's effective shareholding in CMA increased from 57.88% to 77.44% during the financial year.

- BHSB, had on 13 September 2024 issued additional 15,778,474 ordinary shares to the Company for a total consideration of RM151.0 million via conversion of existing shareholders' loan. Accordingly, the Group's effective shareholding in BHSB increased from 75.55% to 77.76%.

During the financial year, the Group recognised a decrease of RM0.1 million and RM34.5 million in consolidated currency translation differences reserve and consolidated retained earnings, respectively and an increase of RM34.6 million in non-controlling interest.

Other than as disclosed above, the accretion of equity interests in subsidiaries did not have a material impact to the Group and the Company during the financial year.

(iv) Incorporation of subsidiaries

- PT Hipernet Indodata, had on 5 April 2024 completed the incorporation of PT Data Enkripsi Informasi Teknologi with an issued and paid-up share capital of IDR10,010.0 million (RM3.0 million).

(b) Significant changes in composition of the Group in the previous financial year

(i) Disposal of equity interest in Reynolds Holding Limited and its subsidiary ("Reynolds Group")

On 1 December 2023, Axiata Investments (UK) Limited ("AIUK"), a wholly owned subsidiary of the Company entered into an unconditional sale and purchase agreement with Spectrlite UK Limited ("Spectrlite") for the sale of Reynolds Group ("Agreement") which owns an approximately 80.00% ordinary shares in issue of Ncell Axiata Limited ("Ncell") for the following consideration:

(A) Fixed consideration of USD50.0 million (RM233.1 million) payable in two tranches of:

- USD5.0 million (RM23.3 million) on or before the date that is 6 months after completion; and
- USD45.0 million (RM209.8 million) on or before the date that is 48 months after completion.

The fixed consideration is interest free and secured via a pledge of certain shares in Axiata (Cambodia) Holdings Limited which are owned by the shareholder of Spectrlite.

(B) Conditional consideration which is contingent upon the future business performance and distributions declared by Ncell and is subject to Ncell receiving relevant regulatory clearances for the payment of the relevant distribution to Reynolds.

Following the disposal of Reynolds Group, the Group did not expect any claims on the legal matters of Ncell.

Accordingly, Reynolds Group ceased to be subsidiaries of the Group and the financial results for the financial period ended 30 November 2023 of Reynolds Group were classified as discontinued operations as Reynolds Group represented a separate major geographical area of operations of the Group.

5. **SIGNIFICANT CHANGES IN COMPOSITION OF THE GROUP (CONTINUED)**

(b) Significant changes in composition of the Group in the previous financial year (continued)

(i) Disposal of equity interest in Reynolds Holding Limited and its subsidiary ("Reynolds Group") (continued)

In the previous financial year and prior to the disposal of Reynolds Group, the Group had recorded the following impairment on Nepal CGU:

- (A) In the previous financial years, management had assumed that GSM licence allocated to the Nepal CGU would be extended in perpetuity as it was expected that the Group would be able to negotiate an extension or appropriate buyback mechanism with the Government of Nepal. Hence, management assumed that the cost of buyback was nil in 2029.

Following the unfavourable outcome from the Bilateral Investment Treaty ("BIT") Arbitration proceedings between AIUK, Ncell against Nepal on 9 June 2023, the Group had reassessed the recoverable amount of the Nepal CGU after considering the probability of the estimated cash outflow for GSM licence renewal in 2029 based on the expected net book value of the fixed assets of Nepal CGU and the fair value of Nepal CGU business in 2029. The Group also considered cash flow projections assuming that GSM licence was not renewed by the Group in 2029.

Based on the assessment above, the Group had impaired total assets of Nepal CGU amounting to RM702.6 million which consist of IA of RM356.3 million, PPE of RM321.2 million and ROU assets of RM25.1 million as at 30 June 2023.

The outcome of the BIT proceedings also resulted in the Group writing off capital gains tax related receivables amounting to RM396.1 million.

- (B) As of 30 September 2023, the Group was in an advanced stage of discussion with potential buyers to sell its entire equity interest in Reynolds Group. Accordingly, the criteria of assets held for sale under MFRS 5 were met and the assets and liabilities of Nepal CGU had been measured at the FVLCTS, determined based on a probability-weighted average of the indicative selling prices. Accordingly, the Group had further impaired total assets of Nepal CGU amounting to RM1,227.3 million, which consist of IA of RM711.9 million, PPE of RM477.7 million and ROU assets of RM37.7 million, in writing down the Nepal CGU classified as held for sale to its FVLCTS.

Both (A) and (B) resulted in total impairment loss of certain Nepal CGU assets amounting to RM2,326.0 million.

Subsequently, the Group completed the disposal of Nepal CGU on 1 December 2023.

The Group and the Company are within the scope of the Organisation for Economic Co-operation and Development (OECD) Pillar Two model rules ("Pillar Two"). These rules are designed to ensure that large multinational enterprises within the scope of the rules pay a minimum level of tax in each jurisdiction where they operate. In general, the Pillar Two apply a system of top-up taxes to bring a multinational enterprise's aggregate effective tax rate in each jurisdiction to a minimum of 15%.

As Pillar Two was effective for the financial year beginning on 1 January 2024 for Vietnam and South Korea, the Group and the Company are within the scope of the Pillar Two for the financial year ended 31 December 2024. The Group and the Company have performed an assessment on the potential Pillar Two income taxes exposure for the current financial year, using the Transitional Safe Harbour rules, where it is stipulated that the top up taxes will be zero if certain tests are met. Based on the assessment, the Group and the Company have no related tax exposure for Vietnam and South Korea jurisdictions as the Group and the Company met the routine profits test in Vietnam and De minimis test in South Korea respectively.

As of 31 December 2024, Pillar Two legislation was enacted in Malaysia, Indonesia, Japan, Singapore and Thailand and will come into effect from 1 January 2025. The Group and the Company are still assessing the potential exposure of Pillar Two income taxes in the above jurisdictions for the financial year ending 31 December 2025.

The Group and the Company have applied the exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes, as provided in the amendments to MFRS 112 "Income Taxes", issued on 2 June 2023.

¹ The shares granted under Axiata PBLTIP shall become vested only upon the fulfilment of certain performance conditions.

² The grant was made to newly hired employees who did not receive the main cycle grant.

³ Eligible employees can only vest the Axiata PBLTIP shares at the end of the third (3rd) year except for Grant 5(c), 2021 and Grant 6(b), 2022. Number of shares initially granted excludes additional shares that may vest due to multiplier effect from achieving performance targets.

⁴ Refers to the five-day average share price preceding reference date for the purpose of granting the number of shares to the employees except for Grant 5(c), 2021 and Grant 6(b), 2022.

14. SHARE-BASED COMPENSATION PLANS (CONTINUED)

(a) Axiata Group Performance Based Long Term Incentive Plan ("Axiata PBLTIP") (continued)

The reference dates and prices, vesting dates, percentage ("%") of shares to be vested and number of Axiata PBLTIP shares granted are as follows: (continued)

- ⁵ Vesting of a subsidiary's long term incentive plan via the allotment and issuance of the Company's shares in accordance with the Bye-Laws governing the Axiata PBLTIP and approved by the Board of Directors.
- ⁶ The unvested Axiata PBLTIP shares are subject to retesting as disclosed in Note 14(a)(v) to the financial statements.

The salient terms and conditions of the Axiata PBLTIP are as follows:

- (i) Maximum number of new ordinary shares of the Company available under the Axiata PBLTIP**

The maximum number of shares which may be allotted upon the vesting of Axiata PBLTIP shares, shall not be more than 7% of the issued and paid-up ordinary share capital of the Company at any point of time during the duration of this Axiata PBLTIP.

If the Company undertakes a share buy-back exercise or any other corporate proposal resulting in the total number of the Company's shares issued and/or to be issued under the Axiata PBLTIP exceeding 7% of the Company's issued and fully paid-up ordinary share capital, all shares under the Axiata PBLTIP offered and/or granted prior to the said variation of the issued and paid-up ordinary share capital of the Company shall remain valid in accordance with the provisions of this Axiata PBLTIP as if that reduction had not occurred.

- (ii) Basis of allocation and maximum allowable allotment**

The total number of new ordinary shares of the Company that can be offered and allotted to any one of the eligible employees (as defined in the Bye-Laws in relation to the Axiata PBLTIP shall be at the absolute discretion of the Board Nomination and Remuneration Committee ("BNRC") that has been established to administer the Axiata PBLTIP from time to time) after taking into consideration such criteria as may be determined by the BNRC at their absolute discretion.

Not more than 10% of the Company's new ordinary shares available under the Axiata PBLTIP will be allocated to any individual eligible employee who, either singly or collectively through persons connected with the eligible employees, holds 20% or more of the Company's paid-up share capital.

14. SHARE-BASED COMPENSATION PLANS (CONTINUED)

(a) Axiata Group Performance Based Long Term Incentive Plan ("Axiata PBLTIP") (continued)

The salient terms and conditions of the Axiata PBLTIP are as follows: (continued)

(iii) Eligibility

Any employee of the Group (other than subsidiaries which are dormant) shall be eligible to participate in the Axiata PBLTIP if the employee, as at the dates of the respective offers of shares:

- (a) has attained the age of eighteen (18) years;
- (b) has entered into a full-term contract of employment with, and is on the payroll of, a corporation within the Group and whose service has been confirmed;
- (c) is not a Non-Executive or Independent Director of the Company; and
- (d) fulfils any other criteria as may be set by the BNRC in its absolute discretion.

Eligibility under the Axiata PBLTIP does not confer on any eligible employee any claim, right to participate in, or any other right whatsoever under the Axiata PBLTIP and an eligible employee does not acquire or have any right over, or in connection with, any Axiata PBLTIP shares under this Axiata PBLTIP unless an offer has been made by the BNRC to that eligible employee and that eligible employee has accepted the offer in accordance with the terms of the offer and the Bye-Laws governing the Axiata PBLTIP.

(iv) Duration of the Axiata PBLTIP

The Axiata PBLTIP shall be in force for a period of ten (10) years from the effective date of implementation, being a date of full compliance with the relevant requirements of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad ("Bursa Securities"). All Axiata PBLTIP shares, whether or not vested, shall forthwith lapse upon the expiry of the Axiata PBLTIP. All unvested shares under the Axiata PBLTIP which are not vested shall forthwith lapse upon the expiry of the Axiata PBLTIP on 30 September 2026.

(v) Retesting of unvested Axiata PBLTIP shares

The Axiata PBLTIP shares that remain unvested after the vesting date will be subject to retesting on a yearly basis until certain unmet performance conditions are met or expiry of the Axiata PBLTIP, whichever is earlier. The retest for unvested Axiata PBLTIP shares will also be subject to the Board of Director's approval.

(b) Axiata Group Long Term Incentive Plan ("Axiata LTIP") (continued)

The reference dates and prices, vesting dates, percentage ("%") of shares to be vested and number of Axiata LTIP shares granted are as follows: (continued)

¹ The shares granted shall become vested only upon the fulfilment of certain performance conditions.

² Eligible employees can only vest the Axiata LTIP shares at the end of the third (3rd) year. Number of shares initially granted excludes additional shares that may vest due to multiplier effect from achieving performance targets.

³ Refers to the five-day average share price preceding reference date for the purpose of granting the number of shares to the employees.

The salient terms and conditions of the Axiata LTIP are as follows:

(i) Maximum number of new ordinary shares of the Company available under the Axiata LTIP

The total number of shares which may be allotted and issued pursuant to the Axiata LTIP shall not exceed in aggregate 3% of the total number of issued shares (excluding treasury shares, if any) at any point in time during the LTIP period ("Maximum Shares").

In the event the Maximum Shares exceed the 3% limit as a result of the Company purchasing the Company's shares in accordance with the provisions of the Act and/or reducing the Company's issued share capital, all offers made and Axiata LTIP granted prior to the said variation of the issued share capital of the Company shall remain valid and exercisable and may vest in accordance with the provisions of the Axiata LTIP as if that purchase and/or reduction had not occurred. If, after such purchase, cancellation or reduction, the Maximum Shares as at the date of purchase, cancellation or reduction of shares exceeds the 3% limit, no further offers and the Axiata LTIP shall be made by the Board until such aggregate number of shares in respect of the Axiata LTIP granted falls below the 3% limit.

(ii) Basis of allocation and maximum allowable allotment

The aggregate number of shares that may be offered and allotted to any one of the eligible employees under the Axiata LTIP at any time shall be determined at the sole and absolute discretion of the Board, after taking into consideration, amongst other factors, the performance as well as the years of service of the eligible employee and such other criteria as the Board may deem relevant (subject always to the Bye-Laws and any applicable law).

(b) Axiata Group Long Term Incentive Plan ("Axiata LTIP") (continued)

The salient terms and conditions of the Axiata LTIP are as follows: (continued)

(ii) Basis of allocation and maximum allowable allotment (continued)

Notwithstanding the foregoing, not more than 10% of the shares available under the Axiata LTIP and/or any other schemes involving new issuance of shares to eligible employees to be implemented from time to time shall be allocated to any individual eligible employee who, either singly or collectively through persons connected (as defined under the relevant applicable law), holds 20% or more of the total number of issued shares (excluding treasury shares, if any). BNRC shall have sole and absolute discretion in determining whether the new shares available for vesting under the Axiata LTIP are to be offered to the eligible employees or any group or groups of eligible employees via:

- (a) one single award at a time determined by our BNRC; or
- (b) several Axiata LTIP Awards where the vesting of the number of new shares comprised in the Axiata LTIP Awards are staggered or made in several tranches at such times, in such sizes and on such terms as may be determined by our BNRC.

In the event our BNRC decides that the Axiata LTIP award or vesting of any number of new shares is to be staggered, the number of new shares to be offered in each Axiata LTIP award and the timing for the vesting of the same shall be decided by BNRC at their sole and absolute discretion. Each Axiata LTIP award shall be separate and independent from the others.

(iii) Eligibility

Any employee of the Group (other than subsidiaries which are dormant) shall be eligible to participate in the Axiata LTIP if the employee, as at the dates of the respective offers of shares:

- (a) has attained the age of eighteen (18) years;
- (b) has entered into a full-term contract or fixed-term contract and whose service has been confirmed; and
- (c) fulfils any other criteria as may be set by the BNRC in its absolute discretion.

The Board and/or BNRC may, at their sole discretion, determine any other eligibility criteria and/or waive any of the eligibility criteria set for the purposes of selecting an eligible employee at any time and from time to time.

(iv) Duration of the Axiata LTIP

The LTIP shall be in force for a period of ten (10) years commencing from the effective date. All unvested shares under the Axiata LTIP which are not vested (whether fully or partially) shall forthwith lapse upon the expiry of the Axiata LTIP on 28 September 2033.

Non-hedging derivatives

(a) Call option over shares held by NCI

Boost Holdings has been granted with a call option to purchase the shares in CMA owned by PT Monetrans Mitra Indonesia at a price equal to 90% of the exit price to increase its shareholding up to 85.00% of the issued and paid-up shares of CMA.

The fair value of the call option is estimated using the Black-Scholes valuation model, taking into account the terms and conditions upon which the call option was granted.

(b) Put option over shares held by NCI in Dialog

In conjunction with the acquisition of Airtel Lanka as disclosed in Note 5(a)(i) to the financial statements, the Group granted Bharti Airtel a put option which requires the Group to purchase up to 952,694,689 ordinary shares of Dialog held by Bharti Airtel. The put option is exercisable at the end of the thirty-sixth (36th) month until the end of the seventy-second (72nd) month from the date of acquisition of Airtel Lanka.

The exercise price of the put option liability is based on the lower of:

- the prevailing 30-day volume-weighted average price as of the date of the put option exercise notice; and
- applicable put option cap price.

The present value of the put option liability is estimated by using the Monte Carlo simulation model incorporating Geometric Brownian Motion in performing the valuation, taking into account the terms and conditions upon which the put option was granted.

(c) Put option over shares held by NCI in Link Net

On 29 May 2024, the Group granted PT Sucorinvest Asset Management a put option which requires the Group to purchase the entire 28,631,954 ordinary shares of Link Net, exercisable between nine (9) and twelve (12) months from 31 May 2024 ("Exercise Period") with an option to extend for another twelve (12) months ("Extended Exercise Period").

The exercise price of the put option liability is based on:

- IDR1,088 per ordinary share of Link Net during Exercise Period; or
- IDR1,251 per ordinary share of Link Net during the Extended Exercise Period.

The present value of the put option liability is estimated by using the Binomial Option Pricing simulation model in performing the valuation, taking into account the terms and conditions upon which the put option was granted.

Derivatives designated as hedging instrument

(d) Cash flow hedge – CCIRS

The Group and the Company entered into CCIRS that have similar critical terms as the hedged item, such as reference rate, reset dates, payment dates, maturities and notional amount. The Group and the Company does not hedge 100% of its borrowings, therefore the hedged item is identified as a proportion of the outstanding borrowings up to the notional amount of the swaps. As all critical terms matched, there is an economic relationship.

The underlying debt instrument for the CCIRS is the Group's Multi-Currency Sukuk and the Company's borrowings from financial institutions as disclosed in Note 16 to the financial statements. The hedging instrument is designed to hedge against foreign currency and interest rate risks.

The CCIRS is designated as cash flow hedge to hedge the currency and interest rate risks of borrowings denominated in USD. The hedge has been fully effective from inception and during the financial year.

The fair value changes of the derivatives of the Group and the Company are attributable to future exchange rates and interest rate movements.

During the financial year, the Group recognised a gain of RM13.4 million (2023: gain of RM107.2 million) in OCI after reclassification of fair value loss of RM95.7 million (2023: gain of RM192.4 million) on the CCIRS from the OCI to the profit or loss – foreign exchange gain/(loss) on financing activities.

During the financial year, the Company recognised a gain of RM16.5 million (2023: gain of RM4.9 million) in OCI after reclassification of fair value gain of RM22.3 million (2023: loss of RM7.7 million) on the CCIRS from the OCI to the profit or loss – foreign exchange (loss)/gain on financing activities.

In the previous financial year, the Company derecognised CCIRS which matured on 8 May 2023. As a result of the derecognition, a gain of RM6.7 million was reclassified from the OCI to the profit or loss.

The Group leases sites for installation of telecommunication structures, retail outlets, land and office buildings. Rental contracts duration is typically between one (1) to forty (40) years (2023: one (1) to forty (40) years) including extension options. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions.

Extension and termination options are included, to provide the Group with greater flexibility to align its need for access to assets with the fulfilment of customer contracts.

* On 27 September 2024, digital telco/mobile Indonesia segment acquired the business-to-consumer segment which served residential customers from fixed broadband segment ("Business Transfer"). Accordingly, the Group has recorded the following:

- (i) A total goodwill of IDR651.1 billion (RM177.1 million) of fixed broadband segment was transferred to digital telco/mobile Indonesia segment.
- (ii) An increase of RM6.9 million and RM73.1 million in consolidated currency translation differences reserve and non-controlling interest, respectively and a decrease of RM80.0 million in consolidated retained earnings.

Impairment tests for non-financial assets of the Group

The Group reviews the carrying value of its IA (including goodwill), PPE and ROU assets based on CGUs identified according to operating segment periodically.

Assumptions used

For the purpose of impairment testing, the recoverable amount of respective CGU, is the higher of VIU and FVLCTS.

Discounted cash flow models based on approved forecasts and projections have been applied to determine the VIU for certain CGUs. The forecasts and projections reflect management's expectations of revenue growth, operating costs, margins and capex based on past experience and future market outlook of the respective CGUs. The cash flows beyond projected years approved are extrapolated in perpetuity using estimated terminal growth rates which takes into consideration Gross Domestic Product ("GDP") growth, inflation and average growth rates for the telecommunication industry. These rates have been determined with regards to projected growth rates for the markets in which the CGUs participate and are not expected to exceed the long-term average growth rates for these markets. In addition, the Group closely monitors the developments in these markets including consolidations and mergers, development of new and emerging technologies and other changes in the telecommunication industry.

For the remaining CGUs where FVLCTS calculations are used for impairment testing, management has applied discounted cash flow models based on market participants' view using level 3 of the fair value hierarchy.

24. **INTANGIBLE ASSETS (CONTINUED)**

Impairment tests for non-financial assets of the Group (continued)

Assumptions used (continued)

(a) Digital telco/ Mobile segment – Indonesia

The recoverable amount of Indonesia CGU was determined using FVLCTS calculation based on cash flows projection covering a five (5) year period.

The following assumptions have been applied in the calculation:

| | <u>2024</u> (%) | <u>2023</u> (%) |
|--------------------------------|--------------------|--------------------|
| Revenue growth rates | 2.7 - 11.1 | 5.4 - 9.9 |
| EBITDA margins | 48.8 - 52.0 | 52.1 - 54.8 |
| Capex to revenue ratios | 11.4 - 15.0 | 18.2 - 22.0 |
| Terminal growth rate | 3.0 | 3.0 |
| Discount rate ^{&} | 10.0 | 10.5 |

[&] Post-tax adjusted discount rate applied to the post-tax cash flow forecasts.

Based on the assessment performed during the financial year, goodwill allocated to the Indonesia CGU was not impaired as the recoverable amount exceeded the carrying amount.

Management's assessment included an impact assessment of changes in key assumptions. Based on the sensitivity analysis performed, the Group concluded that no reasonable change in the base case assumptions would cause the carrying amount of Indonesia CGU to exceed its recoverable amount.

(b) Digital telco/ Mobile segment – Sri Lanka

The following CGUs for which management monitors the goodwill of Sri Lanka digital telco/ mobile segment and its related calculations used in determining each CGU's recoverable amount are as follows:

| | <u>2024</u> | <u>2023</u> |
|-------------------------------|----------------|---------------|
| | RM'000 | RM'000 |
| Mobile operation | 214,442 | - |

| Others | 27,541 | 26,866 |
| | <u>296,383</u> | <u>77,472</u> |

The recoverable amounts of the mobile operation and fixed telephony and broadband CGU were determined using VIU calculations based on cash flows projections covering a four (4) year period.

The following assumptions have been applied in the calculations:

| | <u>Mobile operation</u> | <u>Fixed telephony and broadband</u> | |
|-------------------------|-------------------------|--------------------------------------|-------------|
| | <u>2024</u> | <u>2024</u> | <u>2023</u> |
| | (%) | (%) | (%) |
| Revenue growth rates | 4.7 - 7.7 | 1.8 - 2.4 | 5.5 - 23.7 |
| EBITDA margins | 40.3 - 45.1 | 52.9 - 55.4 | 41.2 - 43.5 |
| Capex to revenue ratios | 10.5 - 13.5 | 4.3 - 5.2 | 11.7 - 13.5 |
| Terminal growth rate | 3.0 | 3.0 | 3.0 |
| Discount rate* and # | 12.0 | 11.9 | 13.9 |

* Pre-tax discount rates applied to the cash flow forecasts were derived from the pre-tax cash flows at the date of assessment of the respective CGUs that reflect the risk of the CGUs.

Due to the impending expiration of tax concession in year 2027, management has adopted a multi-stage approach in discounting the cash flows to consider the tax impact.

In the previous financial year, a multi-stage approach was adopted due to the macroeconomic situation in Sri Lanka and uncertainties in market outlook. Multiple discount rates, considered the current situation, the recovery period and the normalised period, were applied to arrive to a single-stage discount rate as disclosed.

Impairment tests for non-financial assets of the Group (continued)

Assumptions used (continued)

(b) Digital telco/ Mobile segment – Sri Lanka (continued)

Based on the assessment performed, goodwill allocated to the mobile operation and fixed telephony and broadband CGUs were not impaired as the recoverable amount exceeded the carrying amount.

Management's assessment included an impact of assessment of changes in key assumptions. Based on the sensitivity analysis performed, the Group concluded that no reasonable change in the base case assumptions would cause the carrying amount of Sri Lanka CGU to exceed its recoverable amount. The Group has considered improving economic outlook in Sri Lanka and its impact to key assumptions in the expected cash flows.

(c) Digital telco/ Mobile segment – Cambodia

The recoverable amount of Cambodia CGU was determined using VIU calculation based on cash flows projection covering a three (3) year period.

The following assumptions have been applied in the calculation:

| | <u>2024</u> (%) | <u>2023</u> (%) |
|-------------------------|--------------------|--------------------|
| Revenue growth rates | 5.6 - 8.0 | 7.8 - 10.5 |
| EBITDA margins | 55.3 - 56.5 | 51.6 - 53.0 |
| Capex to revenue ratios | 10.4 - 15.6 | 16.1 - 20.1 |
| Terminal growth rate | 2.0 | 2.0 |
| Discount rate* | 15.3 | 16.5 |

* Pre-tax discount rate applied to the cash flow forecasts was derived from the pre-tax cash flows at the date of assessment that reflects the risk of the CGU.

Based on the assessment above, goodwill allocated to the Cambodia CGU was not impaired as the recoverable amount exceeded the carrying amount.

Management's assessment included an impact assessment of changes in key assumptions. Based on the sensitivity analysis performed, the Group concluded that no reasonable change in the base case assumptions would cause the carrying amount of Cambodia CGU to exceed its recoverable amount.

¹ Malaysia consists of two CGUs, Tanjung Digital Sdn Bhd Group and Touch Mindscape Group with goodwill amounting to RM39.2 million and RM1,171.8 million respectively.

The recoverable amounts of all CGUs in infrastructure segment were determined using FVLCTS calculations. Estimates with regard to demand and supply in the tower infrastructure market have been assessed by an external consultant.

The following assumptions have been applied in the calculations:

¹ The forecast period of fifteen (15) years represents the average lease term that is executed with customers and incorporates all agreed changes in lease rates over the lease term.

[^] Key assumptions applied in the impairment assessment are those to which the recoverable amount is most sensitive.

Based on the assessment performed,

(i) **Malaysia CGU**

Goodwill allocated to the Malaysia CGU was not impaired as the recoverable amount exceeded the carrying amount. Management's assessment included an impact of assessment of changes in key assumptions. Based on the sensitivity analysis performed, the Group concluded that no reasonable change in the base case assumptions would cause the carrying amount of Malaysia CGU to exceed its recoverable amount.

(ii) **Pakistan CGU**

Goodwill allocated to the Pakistan CGU was not impaired during the financial year as the recoverable amount exceeded the carrying amount. Management's assessment included an impact assessment of changes in key assumptions. Based on the sensitivity analysis performed, the Group concluded that no reasonable change in the base case assumptions would cause the carrying amount of Pakistan CGU materially exceed its recoverable amount.

(d) **Infrastructure segment (continued)**

Based on the assessment performed, (continued)

(ii) **Pakistan CGU (continued)**

In the previous financial year, the Group recorded an impairment loss on goodwill in respect of Pakistan CGU of RM40.5 million. The recoverable amount of Pakistan CGU was RM418.0 million, derived from future cash flows generated by the underlying assets in the CGU. The impairment loss recognised was attributable to the worsening economic conditions and its applicable effect to the post-tax adjusted discount rate. The management's assessment included an impact assessment of changes in key assumptions. Based on the sensitivity analysis performed and assuming all else remained constant, the effect of movement in the key assumptions to the recoverable amount was as follows:

- If the EBITDA margins were to decrease by 2.0% annually and if the discount rate increased from 22.8% to 23.3% assuming all else remained constant, there would be an impairment of RM70.6 million.

(iii) **Myanmar CGU**

During the financial year, the Group performed impairment assessment on the non-financial assets of Myanmar CGU. Management's assessment included an impact assessment of changes in key assumptions. Based on the sensitivity analysis performed and assuming all else remained constant, the effect of movement in the key assumptions to the recoverable amount is as follows:

- If the average discount rate were to increase from 23.0% to 24.0% and assuming all else remained constant, there would be an impairment of RM24.2 million.

In the previous financial year, the Group recorded a total impairment loss of RM887.9 million which comprising of impairment on goodwill of RM140.6 million, PPE of RM380.4 million, customer contracts of RM263.9 million and ROU assets of RM103.0 million in respect of Myanmar CGU. The recoverable amount of Myanmar CGU was RM291.9 million after considering the following:

- future cash flows generated by the underlying assets in the CGU, factoring the worsening macroeconomic conditions in Myanmar;
- included cost to sell based on estimated transaction value and duration of services; and
- included a discount for lack of marketability which was benchmarked against discounts of other Myanmar businesses in similar recent transactions following the Group's intention to exit Myanmar as disclosed in Note 37 to the financial statements.

The recoverable amount of Myanmar CGU was aligned with the estimated enterprise value of the expected transaction bid price.

(e) Fixed broadband segment

The recoverable amount of fixed broadband CGU is determined using FVLCTS calculation.

The following assumptions have been applied in the calculation:

| | <u>2024</u> (%) | <u>2023</u> (%) |
|--|--------------------|--------------------|
| Number of projection year ¹ | 10 | 10 |
| Revenue growth rates | 4.3 - 22.8 | 7.2 - 20.5 |

| Terminal growth rate | 4.0 | 4.0 |
| Discount rate ^{&} | 10.0 [^] | 10.5 |

¹ The forecast period of ten (10) years represents the duration of the construction and roll out of the HomePasses and the longer gestation period for the fixed broadband CGU to achieve the expected penetration rate and generate cash flows.

[&] Post-tax adjusted discount rate applied to the post-tax cash flow forecasts.

[^] Key assumptions applied in the impairment assessment are those to which the recoverable amount is most sensitive.

Based on the assessment above, goodwill allocated to the fixed broadband CGU was not impaired as the recoverable amount exceeded the carrying amount.

Management's assessment included an impact assessment of changes in key assumptions. Based on sensitivity analysis performed and assuming all else remained constant, the effects of movement in the key assumptions to the recoverable amounts were as follows:

- If the discount rate increases from 10.0% to 10.5% assuming all else remained constant, there would be an impairment of RM36.0 million.

- (b) During the financial year, net book value of telecommunication network equipment subject to operating lease of the Group is RM5,504.2 million (2023: RM6,222.7 million).
- (c) Other than as disclosed in Note 24 to the financial statements, the Group has also performed impairment assessment on the non-financial assets of the following CGUs with an indication of impairment:

- (i) Infrastructure segment – Philippines CGU

The following assumptions have been applied in the calculation:

| | <u>2024</u> | <u>2023</u> |
|--|------------------|-------------|
| Number of projection year ¹ | 15 | 15 |
| Post-tax adjusted discount rate (%) | 10.2 | 11.0 |

¹ The forecast period of fifteen (15) years represents the average lease term that is executed with customers and incorporates all agreed changes in lease rates over the lease term.

[^] Key assumptions applied in the impairment assessment are those to which the recoverable amount is most sensitive.

Based on the assessment above, the non-financial assets of Philippines CGU were not impaired as the recoverable amount exceeded the carrying amount.

Management's assessment included an impact of assessment of changes in key assumptions. Based on sensitivity analysis performed and assuming all else remained constant, the effects of movement in the key assumptions to the recoverable amounts were as follows:

- If the terminal growth rate were to decrease from 4.0% to 3.1%, assuming all else remained constant, there would be an impairment of RM28.5 million.

- (c) Other than as disclosed in Note 24 to the financial statements, the Group has also performed impairment assessment on the non-financial assets of the following CGUs with an indication of impairment: (continued)

- (ii) Digital telco/ Mobile segment – Bangladesh

The recoverable amount of Bangladesh CGU is determined using VIU based on cash flows projections covering a five (5) year period.

The following assumptions have been applied in the calculation:

| | <u>2024</u> (%) |
|-------------------------|--------------------|
| Revenue growth rates | 1.5 - 7.2 |
| EBITDA margins | 49.1 - 52.9 |
| Capex to revenue ratios | 8.3 – 18.0 |
| Terminal growth rate | 6.5 |
| Discount rate* | <u>19.4</u> |

- * Pre-tax discount rate applied to the cash flow forecasts was derived from the pre-tax cash flows at the date of assessment that reflects the risk of the CGU.

Based on the assessment above, the non-financial assets of Bangladesh CGU were not impaired as the recoverable amount exceeded the carrying amount.

Management's assessment included an impact assessment of changes in assumptions. Based on the sensitivity analysis performed and assuming all else remained constant, the Group concluded that no reasonable change in the base case assumptions would cause the carrying amount of Bangladesh CGU to exceed its recoverable amount.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

28. **SUBSIDIARIES (CONTINUED)**

(a) During the financial year, the Company has:

- i) new investment in BHSB of RM1,199.6 million and a reduction in cost of investment in ADS of RM1,199.6 million, via a capital distribution by way of share capital reduction by ADS as disclosed in Note 5(a)(v) to the financial statements.
- ii) additional cost of investment in BHSB of RM151.0 million via conversion of existing shareholders' loan as disclosed in Note 5(a)(iii).
- iii) made a capital injection of RM2.9 million in a subsidiary on 16 April 2024.
- iv) derecognised a total cost of investment of RM87.7 million in ADS following the completion of partial disposal as disclosed in Note 5(a)(ii) to the financial statements.

In the previous financial year, the Company had:

- i) subscribed additional ordinary shares of RM4,660.2 million (restated) in certain subsidiaries by converting RM4,655.7 million (restated) of quasi-investments and RM4.5 million of amount due from subsidiaries respectively.
- ii) received a waiver of an amount due to a subsidiary amounting to RM769.9 million, resulting in a reduction in cost of investment in a subsidiary. The substance of the waiver was a distribution from the subsidiary to the Company via return of capital to the shareholders as disclosed in Note 33(a) to the financial statements.

(b) Impairment tests for cost of investments in subsidiaries

The Company performed impairment assessments of its cost of investments in certain subsidiaries as there were indicators of impairment arising from the changes in macroeconomic outlook and pre-existing business challenges as follows:

i) Impairment assessment for BHSB

During the financial year, the Company recorded an impairment loss of RM234.9 million on its cost of investment in BHSB. The recoverable amount of BHSB is determined based on FVLCTS within Level 3 of the fair value hierarchy, using discounted free cash flows from all the operational activities of businesses of BHSB's subsidiaries and the terminal values are calculated using the exit multiples of comparable companies of each individual subsidiary.

The exit multiples and discount rates used in determining the recoverable amounts of the businesses of BHSB' subsidiaries are ranging from 1.8x to 14.2x and 26.0% to 45.0% respectively.

28. **SUBSIDIARIES (CONTINUED)**

(b) **Impairment tests for cost of investments in subsidiaries (continued)**

i) **Impairment assessment for BHSB (continued)**

Management's assessment included an impact of assessment of changes in key assumptions. Based on sensitivity analysis performed and assuming all else remained constant, the effects of movement in the key assumptions to the recoverable amounts are as follows:

- If the discount rates were to increase by 2.5% from the base discount rates and assuming all else remained constant, there would be an additional impairment of RM92.3 million.
- If the exit multiples of the subsidiaries were to decrease by a range from 5.0% to 20.0% and assuming all else remained constant, there would be an additional impairment of RM121.5 million.

ii) **Impairment assessment for Axiata Investments (Singapore) Limited ("AIS")**

During the financial year, the Company recorded an impairment loss of RM99.2 million (2023: RM85.8 million) by fully impaired its cost of investment in AIS. The underlying asset of AIS comprises an investment in a fund and the fair value of the underlying investments of the fund have been fully written down and management did not expect any return from its investment.

iii) **Impairment assessment for AIUK**

During the financial year, the Company recorded an impairment loss on its investment in AIUK of RM30.8 million (2023: RM810.4 million). The recoverable amount is determined based on VIU using discounted cash flows from AIUK (2023: based on net assets of AIUK as at reporting date). The discount rate used was 10.8% based on the Group's cost of equity.

(c) **NCI**

The total NCI of the Group as at reporting date is RM6,383.5 million (2023: RM6,171.2 million), of which the subsidiaries that have material NCI to the Group are:

- RM2,512.5 million (2023: RM2,651.1 million) is attributable to XL;
- RM947.2 million (2023: RM1,027.9 million) is attributable to Robi; and
- RM1,495.5 million (2023: RM1,440.2 million) is attributable to EDOTCO Group.

The remaining NCI of the Group are individually immaterial.

(c) The Group's share of results of other individually immaterial associates is a profit of RM64.5 million (2023: profit of RM0.2 million).

(d) Impairment test on a material associate

During the financial year, the Group had undertaken an impairment test on its investment in a material associate following an impairment indicator arising from the shortfall between the carrying value and fair value.

Key assumptions used

The recoverable amount the material associate was determined using VIU calculations based on cash flows projections covering a five (5) year period.

The following assumptions have been applied in the calculations:

| | <u>2024</u> (%) |
|-------------------------------------|---------------------------------|
| Revenue compound annual growth rate | 3.1 |
| EBITDA margins | 45.0 - 45.2 |
| Terminal growth rate | 2.5 [^] |
| Discount rate | 8.0 [*] & [^] |

* Discount rate applied to the cash flows forecast reflects the risk of the investment.

[^] Key assumptions applied in the impairment assessment are those to which the recoverable amount is most sensitive.

Based on the assessment above, the carrying amount of the material associate was not impaired as the recoverable amount exceeded the carrying amount.

(d) Impairment test on a material associate (continued)

Management's assessment included an impact of assessment of changes in key assumptions. Based on sensitivity analysis performed and assuming all else remained constant, the effects of movement in the key assumptions to the recoverable amounts are as follows:

- If the terminal growth rate were to decrease from 2.5% to 2.0%, assuming all else remained constant, there would be an impairment of RM319.7 million.
- If the discount rate were to increase from 8.0% to 8.5%, assuming all else remained constant, there would be an impairment of RM596.2 million.

33. **AMOUNTS DUE FROM/TO SUBSIDIARIES (CONTINUED)**

Amounts due from subsidiaries

Maximum exposure to credit risk

Generally, the Company considers amounts due from subsidiaries to have low credit risk as the subsidiaries have capacity to meet their contractual cash flow obligations in the near term and adverse changes in economic and business conditions may, but will not necessarily, reduce the ability of the subsidiaries to fulfil their contractual cash flow obligations. The Company does not specifically monitor the ageing of amounts due from subsidiaries as the Company is able to determine the timing of payments of the subsidiaries' balances when they are payable. The Company considers the amount payable to be in default when the subsidiaries are not able to pay when demanded.

Details of the measurement of ECL is shown below:

| <u>Category</u> | <u>Company's definition of categories</u> | <u>Basis for recognising ECL</u> |
|-----------------|--|----------------------------------|
| Performing | Subsidiaries have a low risk of default and a strong capacity to meet contractual cash flows. | Twelve (12) months ECL |
| Underperforming | Subsidiaries for which there is a significant increase in credit risk due to actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the subsidiary's ability to meet its obligations. | Lifetime ECL |
| Non-performing | Subsidiaries for which there are evidence indicating the assets are credit impaired. | Lifetime ECL |

Based on the above, loss allowance is measured on either twelve (12) months ECL or lifetime ECL using a PD x LGD x EAD methodology as follows:

- PD ("probability of default") – the likelihood that the subsidiary would not be able to repay during the contractual period;
- LGD ("loss given default") – the percentage of contractual cash flows that will not be collected if default happens; and
- EAD ("exposure at default") – the outstanding amount that is exposed to default risk.

33. **AMOUNTS DUE FROM/TO SUBSIDIARIES (CONTINUED)**

Amounts due from subsidiaries (continued)

Maximum exposure to credit risk (continued)

In deriving at the PD and LGD, the Company considers the historical collection trend and expected future cash flows generated by individual subsidiaries. The Company also identified other relevant factors in relation to the geographical area that the subsidiaries operate in and adjust the loss rates based on the expected changes in these factors. Loss allowance is measured at a probability-weighted amount that reflects the possibility that a credit loss occurs and the possibility that no credit loss occurs.

Movements in provision for impairment of amounts due from subsidiaries are as follows:

| | <u>2024</u> RM'000 | <u>2023</u> RM'000 |

(f) Measurement of ECL

- (i) Simplified approach - accrued lease receivables, finance lease receivables, trade receivables and contract assets within the scope of MFRS 15

The expected loss rates are based on the payment profiles of sales over a period of twenty-four (24) months before reporting date and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle receivables. The Group has identified the GDP, inflation rates, interest rates and unemployment rates to be the most relevant factor, and accordingly adjusts the historical loss rates based on expected changes in these factors. At every reporting date, the historical loss rates are updated and changes in the forward-looking estimates are analysed.

- (ii) General 3-stage approach for trade receivables arising from loan receivables and all other financial instruments

The Group and the Company use three (3) categories for trade receivables arising from loan receivables and all other financial instruments which reflect their credit risk and how the loss allowance is determined for each of those categories. A summary of the assumptions underpinning the Group's and the Company's ECL model is as follows:

| <u>Category</u> | <u>Group's definition of categories</u> | <u>Basis of recognising ECL</u> |
|-----------------|---|---------------------------------|
| Performing | Debtors have a low risk of default and a strong capacity to meet contractual cash flows. | Twelve (12) months ECL |
| Underperforming | Debtors for which there is a significant increase in credit risk or significant increase in credit risk is presumed if interest and/or principal repayments are thirty (30) to ninety (90) days past due. For debtors with repayments of ninety (90) days past due, historically, there is no correlation between significant increases in the risk of a default occurring and financial assets on which payments are more than thirty (30) days past due, but there exists a correlation when payments are more than ninety (90) days past due. | Lifetime ECL |
| Non-performing | Interest and/or principal repayments are ninety (90) days to three hundred and sixty five (365) days past due or there is evidence indicating the asset is credit-impaired. | Lifetime ECL |

(f) **Measurement of ECL (continued)**

Based on the above, loss allowance is measured on either twelve (12) months ECL or lifetime ECL using a PD x LGD x EAD methodology as follows:

- PD – the likelihood that the debtor would not be able to repay during the contractual period;
- LGD – the percentage of contractual cash flows that will not be collected if default happens; and
- EAD – the outstanding amount that is exposed to default risk.

In deriving the PD and LGD, the Group and the Company consider historical data by each receivable by categories and adjusts for forward-looking macroeconomic data. The Group and the Company have identified GDP to be the most relevant factor, and accordingly adjusts the historical loss rates based on expected changes in these factors. Loss allowance is measured at a probability-weighted amount that reflects the possibility that a credit loss occurs and the possibility that no credit loss occurs. There is no significant change to estimation techniques or assumptions used.

37. ASSETS AND LIABILITIES CLASSIFIED AS HELD FOR SALE

As of 31 December 2024, the management reassessed and concluded that the proposed exit from the infrastructure segment in Myanmar, which comprised of EDOTCO Investments Singapore Pte Ltd and its subsidiaries ("EIS Group") is no longer highly probable under MFRS 5 as disclosed in Note 4(a)(iii) to the financial statements. Accordingly, the Group has re-presented the financial results of EIS Group as continuing operations as follows:

- (i) The assets and liabilities of EIS Group as at 31 December 2024 were reclassified to their appropriate categories in the consolidated statements of financial position; and
- (ii) The comparative figures in the consolidated statement of comprehensive income and its related notes have been re-presented.
- (iii) The Group have adjusted a total of RM14.0 million relating to amortisation of IA, depreciation of PPE and ROU assets for the financial year ended 31 December 2024, which aligned with what would have been recorded had the assets not been classified as held for sale.

The assets and liabilities of EIS Group as at 31 December 2024 are as follows:

37. **ASSETS AND LIABILITIES CLASSIFIED AS HELD FOR SALE (CONTINUED)**

In the previous financial year, the Board of Directors approved EDOTCO's proposed exit from the infrastructure segment in Myanmar attributed to worsening macroeconomic parameters, business conditions and an active program to seek buyers had commenced. The management assessed and concluded that the proposed exit met the requirements of MFRS 5. Accordingly, the assets and liabilities of EIS Group as at 31 December 2023 were classified as held for sale as follows:

On 17 May 2015, the LTU-VAT of the NBR issued a revised demand letter for BDT4,145.5 million (RM154.4 million) ("2007 to 2011 Revised Claim") to Robi alleging that Robi had evaded payment of supplementary duty and value-added tax ("VAT") levied on the issuance of a certain number of SIM cards to new customers of Robi for the duration from March 2007 to June 2011 when such SIM cards were issued as replacement cards to existing subscribers of Robi.

In August 2015, Robi filed an appeal against the 2007 to 2011 Revised Claim to the Customs, Excise and VAT Appellate Tribunal. Robi deposited 10% of the sum set out in the 2007 to 2011 Revised Claim with the LTU-VAT of the NBR based on provisions of the Value Added Tax Act 1991, as disclosed in Note 34 to the financial statements.

This appeal was first heard on 28 September 2016 by the Customs, Excise and VAT Appellate Tribunal and later reheard on 11 April 2017 by a reconstituted bench of the Customs, Excise and VAT Appellate Tribunal. The Customs, Excise and VAT Appellate Tribunal dismissed Robi's appeal.

In September 2017, Robi filed an appeal to the High Court of Bangladesh against the Customs, Excise and VAT Appellate Tribunal's decision ("VAT Appeal No. 1").

2. Robi vs LTU-VAT of the NBR (SIM Replacement Tax)
(continued)

Robi SIM Replacement Dispute July 2012 to June 2015
(continued)

Robi has filed an appeal to the High Court of Bangladesh against the Customs, Excise and VAT Appellate Tribunal's decision ("VAT Appeal No. 2").

On 23 November 2020, the VAT Appeal No. 2 pending in the High Court of Bangladesh was fixed for hearing whereupon the High Court of Bangladesh ordered parties to file the remaining paper books.

On 3 December 2020, the High Court of Bangladesh took the view that Robi will need to file a Revision Application for the VAT Appeal No. 2 under the new Value Added Tax and Supplementary Duty Act 2012 which became effective on 1 July 2019. Pursuant thereto, Robi will have to deposit a further 10% of the sum set out in the respective demand notice with the LTU-VAT of the NBR.

Robi has filed written arguments against such view on the basis that the new Value Added Tax and Supplementary Duty Act 2012 is not applicable. This legal point was heard on 2 March 2021 in which the High Court of Bangladesh dismissed Robi's argument and advised Robi to file a Revision Application under the new Value Added Tax and Supplementary Duty Act 2012. Subsequently on 23 March 2021, Robi filed a Civil Miscellaneous Petition for Leave to Appeal ("CMP") before the Appellate Division of the Supreme Court of Bangladesh contending the dismissal. Pending the hearing of the CMP by the Appellate Division, the High Court Division of Supreme Court of Bangladesh issued a certified copy of the judgement on maintainability on 23 August 2021. Robi subsequently filed a Civil Petition for Leave to Appeal ("CP") before the Appellate Division of the Supreme Court of Bangladesh. The CP is now pending for hearing.

The Board of Directors, based on external legal advice received, are of the view that it has good prospects of succeeding on the claim.

| | <u>2024</u> | <u>2023</u> |
| | RM'million | RM'million |
| 3. <u>Robi's tax position</u> | 119.0 | 133.5 |

Robi has claimed certain expenses as deductible expenses in its tax provision computations for the FY 2005 to 2020 (2023: FY 2005 to 2019). The NBR has challenged its claims and regarded those expenses as non-deductible. Notwithstanding this, the tax provision for FY 2021 to 2024 remains consistent with Robi's tax position for FY 2005 to 2020 in relation to certain expenses claimed as deductible.

Robi deposited between 10% to 25% of the tax liability with the NBR at different stages of appeal based on provisions of the Income Tax Ordinance 1984.

Included in Robi's tax provision computations is a claim on SIM tax subsidy as a deductible expense. NBR has challenged this claim on grounds that the subsidy is collected from customers and therefore is not a 'business expense'.

Based on external legal advice received, the Board of Directors are of the view that Robi has good prospects of succeeding on the remaining claims.

In addition, there are similar Bharti Airtel Limited ("Airtel") cases amounting to BDT339.8 million (RM12.7 million) which are indemnified by a third party arising from a business combination.

BTRC conducted an information system audit on Robi for the years between 1997 to 2014 and issued a claim of BDT8,672.4 million (RM323.0 million) against Robi on 31 July 2018 ("Information System Audit Claim"). This Information System Audit Claim was disputed by Robi, and a Notice of Arbitration was served on BTRC on 30 May 2019.

On 13 June 2019, notwithstanding Robi's Notice of Arbitration, BTRC directed Robi to make payment for the Information System Audit Claim within 10 days. Challenging the demand, Robi filed a suit on 25 August 2019 before the Joint District Judge, Dhaka seeking a declaration and permanent injunction against BTRC's Information System Audit Claim. The District Court admitted the suit.

Additionally, Robi filed an application seeking an ad interim relief in relation to (i) temporary injunction restraining BTRC from demanding payment of the Information System Audit Claim; (ii) temporary injunction restraining BTRC from causing any interference with the operations of Robi's mobile telecommunication services; and (iii) direction from the court to the effect that BTRC shall issue all relevant No Objection Certificate(s) for the importation of telecommunication equipment and software, and grant all relevant approvals for tariff, service, package, etc. as and when required by Robi from time to time.

The abovementioned application for ad interim relief was dismissed on 1 September 2019 by the Joint District Judge, Dhaka. Robi preferred an appeal before the High Court of Bangladesh in respect of the rejection of temporary injunction application on 5 September 2019.

Robi deposited these five (5) equal instalments by 31 May 2020, as disclosed in Note 34 to the financial statements. This matter is currently pending for hearing before the Joint District Judge, Dhaka. | | |
| Separately, on 10 January 2023, the Honourable Appellate Division of Supreme Court of Bangladesh announced verbal judgement on the 2G spectrum fees and licence fees that allows the appeal filed by BTRC, without deducting 15% value added tax. Similar claim amounting to BDT1,412.1 million (RM52.6 million) is included in one of the items from the Information System Audit Claim of BDT8,672.4 million. Robi recognised BDT1,412.1 million as provision in the previous financial year following the verbal judgement and consequently, reduced the potential exposure by the same amount. | | |

39. **SEGMENTAL REPORTING**

By business segments and geographical locations of the key operating companies of the Group

Management has determined the operating segments to be based on the management reports reviewed by the Board of Directors as CODM.

The business segments of the Group represent the core businesses and geographical locations of the key operating companies based on the operating results regularly reviewed by the Board of Directors. The business segments of the Group are as follows:

(i) Digital telco/ Mobile segment

The digital telco/ mobile business of the Group is segmented based on the countries in which the key operating companies operate. The reportable segments are principally engaged in the provision of mobile services and other services such as provision of interconnect services, sale of devices, pay television transmission services, broadband services and digital business and others.

(ii) Fixed broadband segment

The fixed broadband segment is principally engaged in broadband and broadcasting business.

(iii) Infrastructure segment

The infrastructure segment is principally engaged in the provision of telecommunication infrastructure and related services. Although the infrastructure segment operates in different geographical locations, resource allocation decisions and business performance management for this segment are viewed as a single business unit by the Board of Directors. This is consistent with the current practice of internal reporting. As such, the geographical information on infrastructure segment is not presented.

(iv) Digital segment

The digital segment is principally engaged in multimedia advertising, creative content, e-commerce enablement, digital financial (including digital banking business), digital lifestyle and its related businesses.

(v) Others

Others comprise of investment holding entities, financing entities and other operating companies providing other services including information technology related services in Malaysia and other countries that contributed less than 10% of consolidated revenue.

The Board of Directors assess the performance of the operating segment, before its respective tax charge or tax credits, mainly based on the measure of EBITDA. EBITDA is derived after revenue less operating costs (domestic interconnect, international outpayment and other direct costs, marketing, advertising and promotion, other operating costs, staff costs and net impairment on financial assets). Segment assets and segment liabilities are not used in decisions about allocation of resources and in assessing the performance of the operating segments.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

40. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

(a) Market risks consist of:

- (i) price risk – risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instrument traded in the market.
- (ii) foreign currency exchange risk – risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates.
- (iii) fair value interest rate risk – risk that the value of a financial instrument will fluctuate due to changes in market interest rates.
- (iv) cash flow interest rate risk – risk that future cash flows associated with a financial instrument will fluctuate. In the case of a floating rate debt instrument, such fluctuations result in a change in the effective interest rate of the financial instrument, usually without a corresponding change in its fair value.

(b) Credit risk – risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

(c) Liquidity risk (funding risk) – risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments.

The Group's and the Company's overall financial risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group and the Company. Financial risk management is carried out through risk reviews, internal control systems, insurance programmes and adherence to the Group's and the Company's financial risk management policies. The Board of Directors regularly reviews these risks and approves the treasury policies, which covers the management of these risks. Hedging transactions are determined in the light of commercial commitments. Derivative financial instruments are used to hedge underlying commercial exposures.

(a) Market risks

(i) Price risk

The Group is exposed to equity securities price risk mainly due to:

- investments held by the Group classified on the consolidated statement of financial position as FVTOCI asset, which is fair valued under level 3 fair value estimation; and
- changes in the future cash flows of the put option liabilities due to changes in market price as disclosed in Note 18(b) and Note 18(c) to the financial statements.

The Group continuously monitors market conditions and applies appropriate risk management strategies to manage this risk.

(ii) **Foreign currency exchange risk**

The foreign exchange risk of the Group and the Company predominantly arises from unhedged borrowings denominated in foreign currencies. The main currency exposure from borrowings denominated in foreign currency is USD as disclosed in Note 16 to the financial statements. The Group and the Company's foreign currency exchange risk objective is to manage an acceptable level of USD exchange rate risk. In order to achieve this objective, the Group and the Company targets a composition of natural and contractual hedge based on assessment of its existing exposure and desirable USD exchange rate. To obtain this composition, the Group and the Company uses cross currency swaps and FX forward, where available, and USD currency reserves that are primarily used to hedge USD currency borrowings to reduce the USD currency exposures on these borrowings.

Group

Based on the unhedged borrowings position as at 31 December 2024, if USD were to strengthen/weaken by 10% against BDT, LKR and RM with all other variables held constant, this will result in foreign exchange losses/gains to the profit or loss of RM678.7 million (2023: RM954.4 million) on translation of USD denominated unhedged borrowings.

The exposure to other foreign currency risk of the Group is not material and hence, sensitivity analysis is not presented.

Company

As at 31 December 2024, if USD were to strengthen/weaken by 10% against RM with all other variables held constant, this will result in foreign exchange losses/gains to the profit or loss of RM35.8 million (2023: RM146.9 million) on translation of USD denominated unhedged borrowings.

(iii) **Cash flow and fair value interest rate risk**

The Group and the Company have deposits, cash and bank balances including deposits placed with creditworthy licensed banks and financial institutions. The Group and the Company manage its interest rate risk by actively monitoring the yield curve trend and interest rate movement for the various deposits, cash and bank balances.

The Group and the Company's borrowings comprise borrowings from financial institutions, Sukuk, Bonds and Note. The Group and the Company's interest rate risk objective is to manage an acceptable level of rate fluctuation on interest expense. In order to achieve this objective, the Group targets a composition of fixed and floating borrowings based on assessment of its existing exposure and desirable interest rate profile. To obtain this composition, the Group uses hedging instruments such as CCIRS and IRS as disclosed in Note 18(d) and Note 18(e) to the financial statements.

(iii) **Cash flow and fair value interest rate risk (continued)**

The Company's borrowings comprise borrowings from financial institutions. The interest rate profiles of the Company's borrowings are regularly reviewed against prevailing and anticipated market interest rates to determine whether refinancing or early repayment is warranted.

The Company provided loan to subsidiaries with fixed interest rate. The interest risk profiles of the Company's loan to subsidiaries are regularly reviewed to manage an acceptable level of rate fluctuation on interest income.

Group

As at 31 December 2024, if interest rates on unhedged floating borrowings had been lower/higher by 5% with all other variables held constant, this will result in a lower/higher finance costs of the Group amounting to RM23.3 million (2023: RM30.1 million).

Company

As at 31 December 2024, if interest rates on unhedged floating borrowings had been lower/higher by 5% with all other variables held constant, this will result in a lower/higher finance costs of the Company amounting to RM1.0 million (2023: RM3.2 million).

As at 31 December 2024, if interest rates on loan provided to subsidiaries had been lower/higher by 5% with all other variables held constant, this will result in a lower/higher finance income of the Company amounting to RM0.6 million (2023: RM1.1 million).

Effects of IBOR reform

The reform and replacement of benchmark interest rates such as London Inter-Bank Offered Rate ("LIBOR") and other inter-bank offered rates has become a priority for global regulators. The alternative reference rates are being introduced to improve the integrity of financial benchmark rates as part of a transition to transaction-based rates, in line with the LIBOR reforms. The Jakarta Interbank Offer Rate ("JIBOR") will be replaced with the Indonesia Overnight Index Average ("IndONIA") as the financial benchmark rate for IDR loans in Indonesia on 1 January 2026. The Group continues to monitor market developments in relation to the transition from JIBOR to IndONIA and the impact on the Group's borrowings to ensure that there are no unexpected consequences or disruption from the transition.

As at 31 December 2024, the Group has several borrowings which make reference to JIBOR and extends beyond 2024. The Group's JIBOR based financial instruments as of 31 December 2024 amounted to RM3,989.4 million (2023: RM3,382.3 million).

(b) **Credit risk**

Credit risk arises from trade receivables and other receivables, cash and cash equivalents and financial instruments used in hedging activities.

The Group has no significant concentration of credit risk due to its diverse customer base. Credit risk is managed through the application of credit assessment and approval, credit limit and monitoring procedures. Where appropriate, the Group obtains deposits or bank guarantees from customers.

The Group and the Company place its cash and cash equivalents with a number of creditworthy financial institutions. The Group's and the Company's policy limit the concentration of financial exposure to any single financial institution.

All hedging instruments are executed with creditworthy financial institutions with a view to limit the credit risk exposure of the Group and the Company. The Group and the Company, however, are exposed to credit-related losses in the event of non-performance by counterparties to financial derivative instruments, but do not expect any counterparties to fail to meet their obligations.

The maximum credit risk exposure of the financial assets of the Group and the Company are approximately their carrying amounts as at the end of the reporting period, except for financial guarantee contracts liability. The Company's maximum credit risk exposure arising from the borrowings including interest expenses under financial guarantee contracts amounted to RM11,378.9 million (2023: RM14,743.9 million).

The carrying amount and expected credit losses for amounts due from subsidiaries and trade receivables and other receivables are shown in Note 33 and Note 34 to the financial statements, respectively.

40. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(c) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient liquid funds to meet its financial obligations.

In the management of liquidity risk, the Group and the Company monitor and maintain a level of cash and cash equivalents deemed adequate by management to finance the Group's and the Company's operations and to mitigate the effects of fluctuations in cash flows. Due to the dynamic nature of the underlying business, the Group and the Company aim at maintaining flexibility in funding by keeping both committed and uncommitted credit lines available.

Surplus cash of the Group and the Company are invested in profit bearing current accounts, money market deposits and other instruments with appropriate maturities and sufficient liquidity levels to provide sufficient headroom and to enable the Group and the Company to discharge liabilities in the normal course of business.

As at 31 December 2024, the Group's and the Company's current liabilities exceeded its current assets by RM5,842.5 million (2023: RM4,589.6 million) and RM702.0 million (2023: net current assets RM1,679.7 million), respectively. The Company and its subsidiaries have undrawn facilities from the continuing operations amounting to RM5,379.4 million available to meet liquidity requirements. Additionally, as disclosed in Note 16 to the financial statements, certain subsidiaries of the Group have outstanding undrawn amounts under the Multi-Currency Sukuk, Sukuk Wakalah and EMTN Programme amounting to USD500.0 million (RM2,236.0 million), RM1,600.0 million and USD500.0 million (RM2,236.0 million) respectively. Any issuance of new Sukuk will be subject to market conditions such as market liquidity and market lending rates at the point of issuance. The Group is confident that it will be able to successfully issue the outstanding amounts, if needed, in the next twelve (12) months from the date of the financial statements.

The Group's net cash flows from operating activities for the financial year ended 2024 was RM8,990.1 million (2023: RM7,863.0 million). In addition, the Group's deposits, cash and bank balances as at 31 December 2024 was RM4,860.4 million (2023: RM4,612.1 million).

Where undrawn facilities are not available, subsidiaries' twelve (12) months cash flow forecasts have been prepared taking into account expected revenue growth, past performance and one-off transactions. Based on these cash flow forecasts and available undrawn facilities, the Group is able to generate sufficient cash flows for the next twelve (12) months from the date of the financial statements to meet operational and financing needs, including capital commitments which are due in the next twelve (12) months, as and when they fall due.

The Company is in a net current liabilities position primarily due to borrowings of USD250.0 million maturing within the next financial year. However, the Company anticipates healthy cash inflows, supported by expected dividend income from subsidiaries and associates. Additionally, as mentioned above, the Company has access to undrawn credit facilities, which can be utilised if required to manage liquidity requirements.

(d) **Capital risk management**

The Group's and the Company's objective when managing capital is to safeguard the Group's and the Company's ability to continue as a going concern while at the same time provide returns for shareholders and benefits for other stakeholders as well as to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group and the Company may adjust the amount of dividends paid to shareholders, issue new shares or return capital to shareholders. The Group and the Company maintain a strong credit rating and optimal capital structure that will improve its capital efficiency whilst ensuring availability of funds in order to meet financial obligations, support business growth and maximise shareholder's value through a long-term sustainable dividend policy. The Group's credit rating remains unchanged at Baa2 by Moody's Investors Service (Moody's) and BBB by Standard & Poor's Financial Services (S&P) as at 31 December 2024.

Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratios. This ratio is calculated as total debts over total equity. Total debts including non-current, current borrowings and lease liabilities as shown in the consolidated statement of financial position. Total equity is calculated as 'equity' in the consolidated statement of financial position.

(e) Fair value estimation

The tables below analyse financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identified assets or liabilities (Level 1).
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as stock prices, dividend yield and volatility) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is unobservable inputs) (Level 3).

The Group measures the financial instruments based on published price quotations (Level 1) and market approach valuation technique (Level 2) with inputs of valuation technique such as interest rates and yield curves observable at commonly quoted intervals; implied volatilities; and credit spreads that are observable direct or indirectly as at reporting date.

There is no transfer between Level 1 and Level 2 during the financial year.

40. **FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)**

(e) Fair value estimation (continued)

(i) Financial instruments in Level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

(ii) Financial instruments in Level 2

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments;
- The fair value of cross currency interest rate swaps and interest rate swaps is calculated as the present value of the estimated future cash flows based on observable market curves; and
- The fair value of forward foreign exchange contracts is determined using forward exchange rates at the reporting date, with the resulting value discounted back to present value.

(iii) Financial instruments in Level 3

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques where the underlying assets' significant inputs are not available from observable market data.

(f) **Offsetting financial assets and financial liabilities**

Financial assets and liabilities are offset and the net amounts are reported in the Statements of Financial Position where the Group and the Company have a legally enforceable right to offset the recognised amounts, and there is intention to settle on a net basis or realise the assets and the liabilities simultaneously.

The following table presents the recognised financial instruments that are offset or subject to enforceable master netting arrangements and other similar agreements, as at financial year end. The column 'Net amounts' shows the impact on the Group's and Company's Statements of Financial Position if all set-off rights were exercised.

| | Gross amounts RM'000 | Gross amounts of recognised (financial liabilities)/ financial assets set off RM'000 | Net amounts RM'000 |

44. RELATED PARTY TRANSACTIONS

All related party transactions are entered into in the normal course of business and at prices available at negotiated terms. The names of these related parties, nature of these transactions and their total value have been set out in accordance with the provisions of MFRS 124 - Related Parties Disclosure.

Khazanah Nasional Berhad ("Khazanah") has direct interest of 36.71% in the Company's shares. Khazanah is the sovereign wealth fund of the Government of Malaysia and was incorporated under the Companies Act 2016 on 3 September 1993 as a public limited company.

The Government of Malaysia and bodies controlled or jointly controlled by the Government of Malaysia are related parties of the Group. The Group enters into transactions with many of these bodies, which includes but are not limited to:

- receiving telecommunications services, including interconnection revenue/charges
- purchasing of goods, including use of public utilities and amenities, and
- placing of bank deposits

The Group has established its procurement policies and approval processes for purchases of products and services, which do not depend on whether the counterparties are government-related entities or not.

The Group provides telecommunications services as part of its ordinary operations. The Group has collectively, but not individually significant transactions with Government-related entities. These telecommunication services are carried out on commercial terms that are negotiated and agreed upon between the parties.

Key management personnel are the persons who have authority and responsibility for planning, directing and controlling the activities of the Group or the Company either directly or indirectly. Key management personnel of the Group and the Company include the Senior Leadership Team who report directly to the Group Chief Executive Officer.

Whenever it exists, related party transactions also include transactions with entities that are controlled, joint ventures or significantly influenced directly by any key management personnel or their close family members.

In addition to related party transactions and balances mentioned elsewhere in the financial statements, set out below are significant related party transactions and balances which were carried out on terms and conditions negotiated amongst the related parties.

INDEPENDENT AUDITORS' REPORT
TO THE MEMBERS OF AXIATA GROUP BERHAD
(Incorporated in Malaysia)
Registration No. 199201010685 (242188-H)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Our opinion

In our opinion, the financial statements of Axiata Group Berhad ("the Company") and its subsidiaries ("the Group") give a true and fair view of the financial position of the Group and of the Company as at 31 December 2024, and of their financial performance and their cash flows for the financial year then ended in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

What we have audited

We have audited the financial statements of the Group and of the Company, which comprise the statements of financial position as at 31 December 2024 of the Group and of the Company, and the statements of comprehensive income, statements of changes in equity and statements of cash flows of the Group and of the Company for the financial year then ended, and notes to the financial statements, including material accounting policy information, as set out on pages 8 to 239.

Basis for opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the "Auditors' responsibilities for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence and other ethical responsibilities

We are independent of the Group and of the Company in accordance with the By-Laws (on Professional Ethics, Conduct and Practice) of the Malaysian Institute of Accountants ("By-Laws") and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)

Our audit approach

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements of the Group and of the Company. In particular, we considered where the Directors made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the financial statements as a whole, taking into account the structure of the Group and of the Company, the accounting processes and controls, and the industry in which the Group and the Company operate.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the Group and of the Company for the current financial year. These matters were addressed in the context of our audit of the financial statements of the Group and of the Company as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)

We have determined that there are no key audit matters to report for the Company.

Information other than the financial statements and auditors' report thereon

The Directors of the Company are responsible for the other information. The other information comprises the Directors' Report and Statement on Risk Management and Internal Control, which we obtained prior to the date of this auditors' report, and Axiata Integrated Annual Report 2024 Suite, which is expected to be made available to us after that date. Other information does not include the financial statements of the Group and of the Company and our auditors' report thereon.

Our opinion on the financial statements of the Group and of the Company does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Group and of the Company, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Group and of the Company or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the financial statements

The Directors of the Company are responsible for the preparation of the financial statements of the Group and of the Company that give a true and fair view in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia. The Directors are also responsible for such internal control as the Directors determine is necessary to enable the preparation of financial statements of the Group and of the Company that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Group and of the Company, the Directors are responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Company or to cease operations, or have no realistic alternative but to do so.

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial statements of the Group and of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and of the Company's internal control.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- (d) Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's or on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or the Company to cease to continue as a going concern.

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONTINUED)

Auditors' responsibilities for the audit of the financial statements (continued)

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also: (continued)

- (e) Evaluate the overall presentation, structure and content of the financial statements of the Group and of the Company, including the disclosures, and whether the financial statements of the Group and of the Company represent the underlying transactions and events in a manner that achieves fair presentation.
- (f) Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the Group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the financial statements of the Group and of the Company for the current financial year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

In accordance with the requirements of the Companies Act 2016 in Malaysia, we report that the subsidiaries of which we have not acted as auditors, are disclosed in Note 41 to the financial statements.
